THE FUTURE OF DIVING STARTS WITH YOU.

HUMAN FACTOR DIVING™

Your gear should adapt to you, allowing you to personalise every aspect of your dive. This is the guiding philosophy of every SCUBAPRO innovation. Human Factor Diving™ keeps you at the center of the experience, before, during and after your dive—with gear that's intuitive, comfortable and perfectly suited so all you have to focus on is having an incredible dive experience.

EXPERIENCE HUMAN FACTOR DIVING™ EVERYWHERE

SCUBAPRO leads in every category with gear that's intuitive, comfortable and leaves you free to explore.

REGULATORS

Adapted to your breathing style and type of diving.

INSIGHT

Offering patented features that no other company offers, SCUBAPRO's ongoing development process is laser-focused on designing gear to make your dive unforgettable.

EVALUATION

Designed by divers for divers—SCUBAPRO gear is repeatedly dive tested to prove its usability, long before it hits the shelves, earning the trust of militaries, public safety and specialised diving research organisations the world over.

PERSONALISATION

Gear developed with the Human Factor Diving™ adaptive approach is so smart and intuitive, you only need to focus on one thing: exploration.

DESIGNED FOR WOMEN

SCUBAPRO designs dive gear with special cuts and patterns that take into account the female form, along with enhanced sizing.

COMPUTERS

Personalised dive profiles created using your own biometric measurements.

BCS

Unmatched fit and function, allowing you to take control of your buoyancy.

SUITS

Designed and constructed to deliver comfort, fit and maximum thermal protection.

REGULATORS

TAKE IT ALL IN.

Discover the peace of exploring the water, hearing only the beat of your heart and the relaxed rhythm of each breath. With SCUBAPRO regulator systems, you can do what comes naturally and leave the ordinary behind. Trust the most advanced technologies to give you a truly incredible experience.

THE UNDISPUTED LEADER IN REGULATORS.

When it comes to SCUBAPRO regulators, divers have many choices, including piston and diaphragm designs, user adjustments and convenience features available nowhere else. But a regulator must, first and foremost, deliver smooth and effortless airflow, in all dive conditions, at all depths, with unquestioned reliability. And that's where SCUBAPRO truly shines.

Constructed from the best materials available, such as titanium and carbon fiber

Pre-dive/ dive switch reduces free flow

A PROVEN LEGACY.

Why do so many militaries and public safety teams buy SCUBAPRO? Because they require equipment that can meet their stringent standards, that can endure rugged use and that can be relied upon to work when needed. When you buy SCUBAPRO you're in good company.

A REGULATOR FOR EVERY DIVE.

SCUBAPRO draws from its great variety of regulators to create ideal systems for any diving: casual recreational, travel, cold water, deep or technical.

A –SERIES regulators are the ultimate delivery systems, consisting of an exceptional air balanced valve technology 2nd stage paired with either our MK25 EVO (an air-balanced flow through piston first stage) or with our MK17 EVO (an air-balanced diaphragm first stage with a dry ambient pressure chamber). A-SERIES regulators are unique looking and feeling, offering a dive experience like no other.

S-SERIES regulators are synonymous with SCUBAPRO quality, unbeatable engineering and unbelievable breathing performance. Our range of S-SERIES combinations deliver a steady, effortless flow of air, regardless of depth or workload and maintain inhalation resistance at its lowest possible level. S-SERIES regulators are proven performers, for all types of diving and divers.

G-SERIES regulators are not only historically renowned as excellent regulators but their rugged and reliable reputation has kept them at the top of the list for technical and demanding divers. Our G260 second stages are paired with the MK25 EVO or MK17 EVO first stages.

C-SERIES regulators are built with 'Optimal Flow Design' (OFD), an evolution of classic downstream technology. C-Series mid-range regulators provide a smooth and controlled breathing experience.

R-SERIES regulators use classic downstream technology. They are renowned for safety and reliability. The easy-to-use simple design requires minimal maintenance and with a high level of versatility, they are appreciated as a primary breather, as a back up or on staging bottles.

XTIS (EXTENDED THERMAL INSULATING SYSTEM)
fully insulates the inner mechanical components for extra protection. Available in MK25 EVO and MK2 EVO systems.

XTIS EXTENDED THERMAL INSULATING SYSTEM

ALL THAT'S LEFT IS TO PICK THE PERFECT SYSTEM FOR YOUR GOALS AND DIVING STYLE.

A-SERIES

SCUBAPRO's exceptional A-Series second stages, when teamed with MK25 EVO or MK17 EVO first stage, form the ultimate air delivery systems. Its rugged full-metal casing, front cover and valve housing are able to withstand years of aggressive diving. This metal construction also enables the use of a standard diaphragm inside a more compact casing, increasing breathing sensitivity. The A700 Carbon BT features a handmade full carbon fiber front cover, which is lighter to increase comfort, plus provides excellent shock resistance.

MK25 EVO BT/A700 CARBON BLACK TECH

A lightweight yet virtually indestructible carbon fiber front cover plus a durable Black Tech coating deliver excellent protection while offering superb breathing performance for technical diving and more.
DIN & INT

SCUBALAB TESTER'S CHOICE 2016

MK25 EVO/A700

This always-impressive system can be counted on for steady, effortless airflow and exceptional cold-water protection with its patented Extended Thermal Insulating System (XTIS) technology.
DIN & INT

MK17 EVO/A700

More compact yet delivering better performance than its predecessor, the new MK17 EVO is perfectly paired with the A700. Built for demanding dive conditions, you can always be confident of your next breath.
DIN & INT

LIMITED LIFETIME WARRANTY *All SCUBAPRO regulators feature a 30 years first owner warranty. All first stages are available as DIN and INT versions.*

S620 Ti

new

The revolutionary new S620 Ti regulator touts a long list of features guaranteed to enhance a diver's underwater experience, offering improved work of breathing in a smaller, lighter package—37% better than the S600. Choose between the MK25 EVO T, the MK25 EVO and the MK17 EVO first stages.

Enhanced Flow

Hi-Flow mouthpiece and enlarged mouthpiece pipe, improve comfort and increases airflow. And the super-flow hose delivers more air on each breath.

Compact Size
Huge Performance

The new compact size makes it more comfortable without sacrificing breathing performance.

Versatile and Adjustable

Equipped with full user adjustments, including a new high-grip inhalation effort control knob and a VIVA switch.

Engineered Exhaust Tee

The S620 Ti's new flow-engineered exhaust tee does a great job of diverting bubbles while helping to substantially lower work of breathing.

Breathe Easier - Look Better

Stainless steel components blend with sleek styling.

Total Titanium

MK25 EVO T: Ultra-light, corrosion-resistant first stage is machined from a solid block of titanium—promising a century of trouble-free use.

Built to Last

S620 Ti: The titanium barrel, reinforced technopolymer case and front cover, and stainless steel frame let the S620 Ti withstand years of aggressive diving in any conditions.

S-SERIES

S-Series air-balanced second stages have become synonymous with SCUBAPRO quality, unbeatable engineering and unbelievable breathing performance. Its newest member, the S620 Ti, is a total evolution in its class: more compact, a titanium core (barrel) and an extraordinary high flow exhaust tee, lets you literately feel the difference.

MK25 EVO T/S620 TI new

SCUBAPRO's top regulator technology is on display in this ultra-light, corrosion-resistant reg system. The first stage is machined from a solid block of titanium, and the newly designed high-flow S620 Ti features a full titanium inlet tube. The S620 Ti's work of breathing has been reduced 37% over the S600, due in part to a new high-flow exhaust tee, resulting in a system that delivers effortless airflow under all dive conditions. Only available in DIN .

MK25 EVO/S620 TI new

SCUBAPRO's premium high performance piston first stage and its new state-of-the-art second stage, designed with titanium components, create an incredibly reliable reg system that offers excellent resistance to freezing, superb inhalation sensitivity and an instant delivery of air, in all water temperatures, depths and dive conditions.
DIN & INT

ALL SCUBAPRO REGULATORS EXCEED THE NEW EUROPEAN TEST NORM EN250-2014 STANDARDS!

Due to the high quality of our regulators we have extended the service interval to 2 years or 100 dives (whichever comes first).

LIMITED LIFETIME WARRANTY *All SCUBAPRO regulators feature a 30 years first owner warranty. All first stages are available as DIN and INT versions.*

MK17 EVO/S620 TI new

Built to deliver a steady supply of air in harsh diving conditions, the MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. The new S620 Ti embraces the best features of SCUBAPRO's renowned S600 in an upgraded, state-of-the-art design. Delivering excellent performance; the S620 Ti's work of breathing has been reduced by 37% over the S600, providing effortless airflow under all dive conditions.

MK25 EVO/S600

Flawless performance and ease of breathing are the essence of this system. The preferred combo of professionals or any diver embarking on long, deep dives that require ultra-high performing cold-water protection.
DIN & INT.

MK17 EVO/S600

Teaming SCUBAPRO's best-selling second stage with its newest environmentally sealed first stage creates a reliable air delivery system for all diving conditions.
DIN & INT.

G-SERIES

SCUBAPRO's renowned air-balanced G-Series second stages represent the most imitated air-balanced second stage design of all time. The first G-Series second stage was introduced in 1986, rugged and reliable, today's version features SCUBAPRO's largest second stage casing and diaphragm for the ultimate in breathing sensitivity. Metal components (inlet tube, orifice, inhalation control knob and hose connector) provide excellent cold-water performance, and a left-right hose attachment option is ideal for technical diving applications.

SCUBAPRO BLACK

MK25 EVO BT/G260 BLACK TECH

Aimed at technical divers, this system offers excellent resistance to freezing and effortless air delivery. A sleek Black Tech scratch-resistant DLC (Diamond Like Carbon) finish protects both first and second stages.
DIN & INT

MK25 EVO/G260

Aimed at technical divers, this system can face any dive situation—including extreme cold-water conditions—rock-solid performance and outstanding reliability.
DIN & INT

unterwasser test winner 04/2015 Cold Water Regulator

SCUBALAB TESTER'S CHOICE 2015

MK17 EVO/G260

The ideal system for tech divers and cave explorers. The environmentally sealed first stage is designed for cold waters and less-than-pristine dive conditions.
DIN & INT

For special customer design use safari front cover.

LIMITED LIFETIME WARRANTY *All SCUBAPRO regulators feature a 30 years first owner warranty. All first stages are available as DIN and INT versions.*

C-SERIES

The innovative C-Series reduces the air flow resistance, delivering an impressive work of breathing effort in comparison to the down-stream valve. It is also an ideal technology for cold water diving. The shape of the diaphragm ensures a perfect venturi effect.

MK17 EVO/C350

Balanced sealed diaphragm first stage perfect for cold water diving, paired with a powerflow downstream valve second stage with swivel.
DIN & INT.

MK11/C350

A first stage specially designed to reduce size and weight, plus SCUBAPRO's most compact second stage, make for an excellent travel regulator system. A smooth breathing and reliable breather.
DIN & INT

R-SERIES

R-Series regulators use classic downstream technology. They are renowned for safety and reliability.

MK2 EVO/R195

Featuring a totally evolved classic downstream piston first stage, this workhorse reg delivers impressive breathing sensitivity with steady airflow, plus offers excellent cold-water resistance.
DIN & INT

COMPUTERS

INTELLIGENCE AT HAND.

Every diver feels more confident with the advanced features of SCUBAPRO computers and instruments—combining patented, groundbreaking biometric technology, intuitive operation and Human Factor Diving™. Whether you're new to the sport, or a long time diver, there's a SCUBAPRO computer to make every adventure better.

INTELLIGENCE THAT SETS THE STANDARD.

SCUBAPRO has been revolutionising dive computers since day one. Pioneering oil-filled devices, air integration and heart rate monitoring was just the beginning. Divers turn to SCUBAPRO for exclusive technology, reliable performance and unmatched selection.

Consistent, adaptive algorithms maximise safety and dive time

DON'T JUST MEASURE YOUR BIOLOGY. USE IT.

ADAPTIVE ALGORITHM

Fine-tunes your decompression plan based on your workload as indicated by biometric feedback.

HEART RATE MONITORING

Provides a more complete picture of your workload so you can respond promptly to heightened stress or over-exertion.*

SKIN TEMPERATURE MONITORING

Available when using the SCUBAPRO HRM belt, this patent-pending feature incorporates another critical biological factor into your adaptive algorithm.**

MICROBUBBLE SETTINGS

Enables the adaptive algorithm to adjust based on your experience level, age and physical conditioning.

PROFILE DEPENDENT INTERMEDIATE STOPS (PDIS)

Calculates an intermediate stop based on how much nitrogen your body has endured, taking into account your current dive, previous dives and breathing mixes.

*Available with the Galileo and Mantis series. Diver must be wearing SCUBAPRO Heart Rate Monitoring Belt or Polar Belt.

**Available with the Mantis series. Diver must be wearing SCUBAPRO Heart Rate Monitoring Belt.

PATENTED TECHNOLOGY AVAILABLE NOWHERE ELSE.

Only SCUBAPRO offers computers developed with the Human Factor Diving™ approach. Divers have the power to see their own biology analysed and applied to their dive profile—in real time—for a completely customised dive profile. You can measure your heart rate, breathing workload and even skin temperature—a patented feature only available from SCUBAPRO. No other name offers the same level of personalisation.

PROVEN COMMITMENT TO QUALITY.

Before ever reaching your local dealer, SCUBAPRO prototypes must pass rigorous tests performed by divers and independent research labs. There, all components are subjected to relentless trials for usability and performance. It's the only environment tougher than the real world.

A COMPUTER FOR EVERY DIVE.

Stay nimble with an easy-to-operate wristwatch-style computer, or go pro with fully loaded models. The advanced SCUBAPRO technology in every computer enhances your experience, wherever the dive may be.

Dive, Freediving, Gauge and CCR modes

Diving profiles based on your biometrics

Easy to use, intuitive menus designed by dive and usability experts

Configurable displays allow you to see as much information as you want

HUMAN FACTOR DIVING™

STROKE COUNTER

Record your distance—in the open water or the pool—to track progress of your fitness goals. Available in swim mode.

CALORIE TRACKER

Another valuable health tracking technology available with LogTRAK software.

TRACK YOUR PROGRESS

Data gathered through your self-tracking computers can be downloaded for analysis using LogTRAK and SmartTRAK software, available for PC, Mac and as an Android app.

Extensive Choices for Every Diver

Differing modes (CCR, Scuba and Gauge) allow recreational and technical divers to utilise the same computer.

Advanced Technology

Including heart rate and skin temperature monitoring, CCR and Swim modes, Trimix algorithms and personalisation options.

Versatile Features

Made for the waterman, not just the diver—with modes like Sport, Freediving and Swim, plus calorie counting (when using LogTRAK).

Configurable Displays

To make the computer your own for easier operation.

MANTIS

KEY FEATURES

- Deco, Gauge, Freediving and CCR dive modes
- Fixed PPO2 CCR algorithm for closed circuit rebreather diving
- Predictive Multi-Gas algorithm for nitrox diving
- Chronograph with lap memory
- Swim mode that memorises swim time and strokes (converts to distance)
- Heart rate monitor with optional SCUBAPRO HRM belt
- Marine-grade 316L stainless steel casing and two-toned brushed finish
- Hoseless gas integration gives tank pressure and true remaining bottom time (M2 only)
- Digital tilt-compensated onboard compass allows for easy navigation under water or on the surface (M2 only)
- LogTRAK software available for PC/Mac and Android
- Maximum depth rate: 394ft/120m

*Shown with optional metal band, not included.

COMPLETE

M2 CRADLE

M2 (MANTIS 2)

The M2 is a dive computer like no other. Developed using SCUBAPRO's Human Factor Diving™ approach to product design, the M2 offers everything you expect from the leader in diving equipment. Its stylish, brushed stainless steel casing is loaded with topside features and advanced underwater functions, including air integration and electronic navigation. But most importantly, the M2 incorporates cutting-edge biometrics that enable you to live your life in dive mode.

SHOWN WITH OPTIONAL COLOUR BANDS. BANDS WORK WITH BOTH THE M2 AND CHROMIS.

MANTIS 1 BLACK TECH

Black Tech version. PVD (Physical Vapor Deposition) scratch-resistant coating and a stealth finish.

SCUBAPRO BLACK

INTERFACE CRADLE

OPTIONAL COLOUR BANDS FOR MANTIS 1

MANTIS 1 (M1)

A precision blend of sophisticated computer and beautiful timepiece, the M1 is designed for divers who crave the cutting-edge technology of the M2 but don't need air integration or an on-board digital compass. Incorporating SCUBAPRO's Human Factor Diving™, the M1 provides detailed personalised data through the use of biometrics. Offering just the right balance of topside features and underwater functions, you can count on the M1 for industrial-strength reliability that lasts.

SHOWN WITH OPTIONAL COLOUR BANDS

SCUBAPRO HEART RATE BELT

Monitors both heart rate and skin temp and allows computer to include diver's physiology in decompression calculations.

M2 (MANTIS 2)

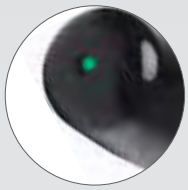
Successor to the breakout Mantis computer. Created for divers who demand air integration, the most comprehensive biometric monitoring, and a sleek, stainless steel design. Featuring the same algorithm as the Galileo computer, the M2 makes for a perfect primary or secondary computer option. Experience the latest Human Factor Diving™ innovation that allows divers to feel more liberated than ever.

Easy to Read and Use

Exclusive, extra-sharp characters and intuitive four-button menu make the M2 easy to read and use.

Versatility Above and Below

Take advantage of the SCUBA, Freediving, Gauge and CCR modes, plus Swim and Sport modes for topside use.



Real Time Air Integration

Blinking, coloured light of the Smart Transmitter informs you of your tank pressure. No high-pressure hose necessary.

Swiss Engineering and Style

Smart computing and comprehensive features, all packed into a stunning piece of Swiss engineering and design.

*Shown with optional all metal band

Biometric Monitoring

Partner the M2 with the exclusive SCUBAPRO Heart Rate Monitoring belt to incorporate your heart rate and skin temperature into the computer's decompression calculation. The result is a personalised dive profile that increases your safety—and maximises your diving experience.

SWISS DESIGN
ENGINEERING

GALILEO

KEY FEATURES

- Extra-large dot matrix display
- Four-second sampling rate
- Hoseless gas integration
- Continuously updated average depth display
- Exclusive integrated heart rate monitor (optional on Luna)
- Full-tilt digital compass
- Personalisation options
- Trimix Algorithm (optional download)
- Predictive Multi-Gas (optional on Luna)

GALILEO SOL

The ultimate dive computer, Sol contains all core SCUBAPRO features in addition to all technology exclusive to the Galileo series. This state-of-the-art computer accounts for the effect of increased workload on human physiology with features like the integrated heart rate monitor which tailors decompression calculations to your dive.

COMPLETE

GALILEO LUNA

The Galileo Luna is everything you need for an extraordinary underwater experience. The Luna contains all core SCUBAPRO technology and all features of the Sol except three, which can be added as optional upgrades later (heart rate monitor, Trimix Algorithm and Predictive Multi-Gas).

LED & SMART + TRANSMITTER

Convenient and safe, a SCUBAPRO transmitter allows you to read tank pressure and true remaining bottom time (RBT) on the computer screen. It needs only to be paired once, the first time you use it. Coded transmission technology prevents interference between different dive computers. The latest LED version lets you know if your tank has gas without needing to activate the computer. Compatible with Galileo Sol, Galileo Luna and Mantis M2 personal dive computers.

SMART+

LED

CHROMIS

KEY FEATURES

- Extra-sharp characters inspired by Samurai katanas—and developed exclusively for Chromis—are proven to be exceptionally readable under water
- Patented stroke counter keeps track of strokes from the wrist or fin kicks from the ankle, while also calculating distance
- PC/MAC interface with USB interface cradle accessory
- Continuously updated average depth display in gauge mode which can be reset by the diver at any time
- Independent stopwatch under water in scuba and gauge modes
- Maximum depth rate: 394ft/120m

CHROMIS

new colours

A loaded wrist computer, the Chromis is ready for your next adventure, in or out of the water. Divers will enjoy the large, easy-to-read display and a host of features, including a full-featured dive computer, freediving and gauge modes, timepiece, and patented stroke counter. The Chromis has all the core SCUBAPRO features minus PMG.

Enjoy the Chromis in a colour that celebrates your diving style.

WHY MEASURE YOUR HEART RATE?

From monitoring your heart health to personalising your dive algorithm—measuring heart rate and skin temperature can benefit divers of all ages and skill levels. Heart rate and skin temperature can be considered the primary indicators for a body's workload. As stress or workload increases, heart rate and skin temp increase. As heart rate increases, oxygen uptake increases, as does the uptake of nitrogen. And an increase in nitrogen absorption is critical information for maintaining a safe dive.

With SCUBAPRO's HRM belt, your heart rate is measured in four-second samplings to ensure diving activities stay within an individual's "safe zone." It's a valuable tool that promotes health, safety and performance—and it's only available with SCUBAPRO dive computers.

THE SCUBAPRO HEART RATE BELT WORKS EXCLUSIVELY WITH THE MANTIS 2 AND GALILEO COMPUTERS.

ALADIN

For 30 years Aladin dive computers have been providing discerning divers of all skill levels with a range of computing choices, in a variety of configurations, to suit virtually any dive scenario. This year's SCUBAPRO Aladin (Matrix) series takes it to a whole new level, with air integration, a digital compass and Bluetooth® technology. Offering high-end features in a highly affordable dive computer, whether you're an experienced technical diver or a beginning recreational diver, there's a SCUBAPRO Aladin (Matrix) dive computer for you.

ALADIN SPORT (MATRIX) new

Perfect for technical divers who want multi-gas functions as well as recreational divers who appreciate a dive computer with a variety of modern features that enable them to evolve in their sport.

Digital compass and Bluetooth® Low Energy technology.

ALADIN H QR (MATRIX) new

A sharp-looking full-featured dive computer targeted to avid recreational divers looking for a convenient air-integrated DC. Algorithm calculates remaining bottom time (RBT) and estimates workload based on breathing rate.

Digital compass and Bluetooth® Low Energy technology.

RETROFIT WITH QUICK RELEASE HOSE CONNECT.

DIGITAL 330M

Electronic data delivery system provides actual and maximum depth, ascent speed, dive time and temperature.
Rated to 330m.

3-GAUGE IN-LINE CONSOLES

Pressure and depth gauges with 35-degree-tilt FS-2 or FS-1.5 compass.

2-GAUGE COMPACT CONSOLES

Sturdy, ergonomic and compact consoles for depth and pressure or pressure and compass.

PRESSURE GAUGES

Compact instruments reading 0-400 bar.

FS-1.5

FS-2

COMPASSES

FS-1.5 calibrated to the Northern hemisphere or the FS-2 for both hemispheres.

DEPTH GAUGE, WRIST MOUNT

Oil-filled Bourdon tube design in an impact-resistant nylon case.

C-1 COMPASS

A very compact model for general orientation on recreational dives.

CORE FEATURES

For all SCUBAPRO Dive Computers

Micro-bubble: Choosing a micro-bubble level between L0-L5 allows you to increase your safety by adapting to a particular environment. This feature allows divers to either take up less nitrogen or off-gas more quickly.

Predictive Multi-Gas (PMG): Lets you enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas. The computer calculates the decompression schedule for all possible gas combinations and adapts the calculation accordingly. (Not available on Chromis, optional on Luna).

Continuous average depth reading: Available in gauge mode and can be reset by the user anytime.

Profile Dependent Intermediate Stops (PDIS): Calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives and breathing mixes.

Enriched air (Nitrox): 21%-100%. The ppO2 is adjustable between 1 and 1.6 bar.

Gauge mode: Turns off all warnings and alarms (except low battery alerts) and monitors depth, time and temperature without decompression calculations.

Logbook: Records depth, temperature and heart rate profiles after the dive and stores the most recent 100 hours of dive information at a 4-second sampling rate, which can be downloaded to a PC.

Freediving mode: A collection of features developed for freedivers, including a faster sampling rate, manual start, specialised alarms and warnings, adjustable water density, and specific logbook. Available as a free upgrade for Galileo Sol and Galileo Luna on SCUBAPRO.com. (Not available on the Aladin H).

Altimeter: Measures altitude and alerts the diver when approaching an altitude incompatible with saturation status after a recent dive.

Bookmark: Allows you to highlight specific moments with a simple button press.

Active back light: With push-on and push-off function.

Replaceable battery: By user or dealer.

SCUBAPRO

BCs

FORM MEETS FUNCTION.

Your BC should be in perfect harmony with you. That's why SCUBAPRO offers the ideal combination of comfortable fit, flexibility and intuitive design. Everything right where you need it. No wasted effort. Adjustments easily made on the fly. See how much more you can explore with the freedom of knowing that you and your gear are working as one.

CONTROL THAT'S SECOND TO NONE.

Any jacket lets you adjust buoyancy. Only SCUBAPRO BCs, created with Human Factor Diving™ innovation, put you in charge of the dive. Discover the power of having the most personalisation features, superior comfort and premium construction on your side.

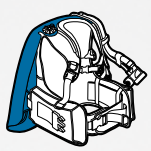
Dump valves everywhere you need them

Durable components that withstand any conditions

Rip-resistant nylon

COMFORT AT EVERY ANGLE.

SCUBAPRO takes a unique approach to designing BCs; thinking beyond the water to give you the best experience before, during and after the dive. Accomplishing that goal starts with offering the industry's widest selection of sizes and styles, each tailored for differing body types and diving. Female divers in particular never have to sacrifice style or specialised fit with a SCUBAPRO BC.



BACK-FLOTATION

FRONT-ADJUSTABLE

STABILISING

Once on, easy-adjustment features provide snug comfort that stays put. In the water, ultra-soft design and flexibility allow you to move naturally—so you can spend downtime exploring, not adjusting.

After the dive, SCUBAPRO BCs dry quickly and pack smart for easy travelling to the next adventure.

MADE TO BECOME YOURS.

SCUBAPRO BCs include all your favorite options, with many ways to make it your own. Choose from a spectrum of colour choices. Customise your BC with accessory kits and mountable knives. Take advantage of a multitude of configuration options on every jacket. Add an AIR2 5th generation to streamline your diving with a secondary air source that breathes like your regulator. However you use it, your SCUBAPRO BC is made to meet your needs.

BUILT FOR A LIFETIME OF DIVES.

SCUBAPRO BCs are durable beyond the rigors of typical diving, down to the last detail. Every buckle, zipper, strap and grommet is tested for real-world durability and long-term use. High-quality fabrics are incorporated throughout the BCs for additional rip resistance and lasting shape. When divers are ready to upgrade to the highest-quality BC available, they choose SCUBAPRO—the first choice of instructors around the world.

HUMAN FACTOR DIVING™

The Most Style Options

Including fits for women.

Designed for More Control

So you can find balance regardless of orientation.

Features Offered Nowhere Else

Such as three dump valves on many of our BCs.

BACK FLOTATION

HYDROS PRO travel friendly

A true breakthrough in design, dive comfort and convenience, our premiere back flotation BC, made with moldable Monprene®, is built for anyone who loves to dive. The HYDROS PRO is the most feature-rich, the most customisable and the most comfortable BC ever. Its 2-BCs-in-1 design makes it the perfect BC for any destination and any dive. In Men and Womens sizes.

HYDROS PRO

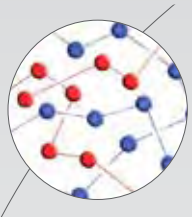
THE ABILITY TO CHANGE ANYTHING, CHANGES EVERYTHING

reddot design award
winner 2016

Introducing the key to transforming your dive experience. **HYDROS** PRO is an incredible feat of SCUBAPRO engineering—offering unprecedented convenience, on-the-go configuration, specialised fits and more. **HYDROS** PRO isn't just for professionals. It's for anyone who loves to dive.

2 BCs in 1

With a quick switch of clips, **HYDROS** PRO transforms from a basic harness travel BC to a jacket with fully integrated weight pockets.



Exclusive Gel Harness System

Replaces traditional manufacturing methods by replacing stitched fabric with soft, resilient Thermoplastic Elastomer harness components. The Monprene® Gel construction conforms to your body for extreme, lasting comfort.

Accessorise

Modular system allows customisation and repairs.

Travel Friendly

Interchangeable straps, a packable design and an included backpack with room for your entire dive kit make the HYDROS PRO perfect for any destination and any dive.

Instant Dry and Durable

No water absorption means neutral buoyancy and a lightweight BC that is dry when it comes out of the water. **HYDROS** PRO also stands up to UV, chemicals and abrasion.

BACK FLOTATION

SEAHAWK

The Seahawk is a leading member in our family of dynamic, comfortable back flotation jackets. The Seahawk allows excellent freedom of movement, while still providing adequate storage with traditional cargo pockets.

SCUBALAB 2010 TESTERS' CHOICE

LITEHAWK

travel friendly

The Litehawk is the travel version in our back flotation family. With a soft, flexible pack instead of a rigid backpack, it is exceptionally light and rolls to pack tightly. Incorporates many of the great features of our back flotation BCs in a high-performing, lightweight BC. Size XS/S weighs just 4.8lbs/2.2kg.

SCUBALAB TESTER'S CHOICE 2015

Certified as a regulator.

AIR2 5TH GENERATION

This fifth-generation octo/inflator is both versatile and easy to use. As a backup regulator in high-stress situations, the AIR2 breathes like a dream, rivaling some second stage models. It is CE-certified for waters 10-degree Celsius or warmer. The large, flexible purge button provides quick clearing when it counts. Divers can also enjoy pinpoint buoyancy control with the AIR2. Its large inflate and deflate buttons are easy to distinguish, and the device fits comfortably in hand. For reliable performance without dangling hoses, the AIR2 is a standout.

For sizing, see chart on page 41.

FRONT ADJUSTABLE

X-BLACK

The X-Black features the exclusive AirFlex system, highlighted by the red bungees, that simplifies buoyancy control and guarantees high stability. With rigid backed weight pockets, redesigned dump valves and updated BPI and elbow. One of our most feature-rich BCDs, the X-Black is also one of the most comfortable, even when fully inflated, thanks to its ergonomic cut.

X-FORCE

X-Force features our pre-formed, wrap-around bladder providing higher buoyancy without squeezing when fully inflated. This design offers superior fit and weight distribution. X-Force is more than a powerhouse of features, making it the preferred choice of passionate and advanced recreational divers. With rigid-backed weight pockets, redesigned dump valves and updated BPI and elbow.

BPI

The Balanced Power Inflator has a streamlined and ergonomic design. The inflation button is easy to locate and requires little effort. A soft mouthpiece has been added. The corrugated hose features an, easy to use SQAP (Safe and Quick Air Pin) lever and a connection between hose and elbow valve.

FRONT ADJUSTABLE

BELLA upgraded

Specifically designed and meticulously tailored for the female diver. This high-end, front-adjustable BC has every detail, including a SCUBAPRO-exclusive wraparound air bladder that retains its cradle-like shape even when fully inflated. The Bella will allow you to experience the most comfortable diving ever.

EQUALIZER new

The Equalizer brings together all the best features you could ever want in a recreational diving BC. Its high performance wraparound bladder is lightweight, durable, and extremely comfortable. In reliability and performance this BC has no equal.

GLIDE X upgraded

This BC allows you to experience extremely comfortable diving. The SCUBAPRO-exclusive wraparound air bladder retains its cradle-like shape even when fully inflated. Fully adjustable, it comes with an integrated weight system and a wide range of exceptional features.

For sizing, see chart on page 39.

EQUATOR upgraded

The Equator is extremely comfortable and fully adjustable. It comes with an integrated weight system and a wide range of great features. Its compact and lightweight design make it an ideal front-adjustable BC for diving at home or elsewhere.

GO travel friendly

Go dive the world with this true travel BC. Lightweight, easy-to-pack and extremely comfortable, it includes an integrated weight system, new optional trim pouches and a bevy of other original features, as well as SCUBAPRO quality, style, and spirit of adventure. The large size weighs only 5.7lbs/2.6kg.

STABILISING

MASTER improved

The Master Jacket has been certified as a Combined Buoyancy and Rescue Device thanks to its lift capacity and the "face-up" body position at the surface. It is the stabilising BC choice of commercial, military, instructors and advanced divers needing intensive use, precise buoyancy control and comfort.

SCUBAPRO

X-TEK

FASCINATION TECH.

Dive in to a new dimension and experience pure adventure. Our X-TEK line is based on many years of experience and the expertise of SCUBAPRO's engineers. The modular X-TEK systems fit every tech diving philosophy – without sacrificing quality, durability, ease of use or overall diving comfort.

X-TEK

X-TEK SIDEMOUNT SYSTEM

This easy-to-wear addition is compatible with the current X-TEK line and features a soft Airnet backpack, bungees and hooks for tank support and streamlining, making sidemount diving more convenient and comfortable. Includes stainless steel grommets, D-rings, handles and valves.

KEY FEATURES

- 1000D Cordura outer shell
- Soltane inner bladder
- Ergonomic SCUBAPRO balanced inflator
- Specifically designed for sidemount harness
- Attached crotch strap

MK25 EVO/G260 SIDEMOUNT REGULATOR SET

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving. There's no better example of solid first stage performance in all water temperatures than the MK25 EVO. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

KIT CONTAINS:

- 2 x MK25 EVO DIN 300/G260
- 2 x Compact gauges
- 2 x BPI quick coupling
- 1 x LP hose elbow
- 2 x HP hose 20cm
- LP hoses: 2 x 20cm, 1 x 64cm, 1 x 210cm
- 1 x Regulator Necklace

SYSTEMS

X-TEK PURE TEK

X-TEK FORM TEK

PRO & EXTREME PRO TEK

HARNESSES

X-TEK FORM TEK

A 3-piece harness system with anatomically optimised back padding and shoulder straps that can be adjusted in length and alignment for maximum comfort. Comes with stainless steel D-rings. The harness can be equipped with an optional quick-release weight system.

X-TEK PURE TEK

Made of secure, continuous webbing which weaves through a back plate to provide a custom fit. Included: waist buckle, two shoulder D-rings, one left D-ring on the waist belt and "tri-glide" fasteners.

JACKETS SHOWN FULLY ASSEMBLED WITH CROTCH STRAP AND BACKPLATE, NOT INCLUDED.

X-TEK PRO TEK

Available with or without stainless steel backplate. With continuous webbing, padded shoulder straps and two stainless steel D-rings on each side. Includes back plate storage pack to fix a buoy.

WINGS

X-TEK DONUT

Unprecedented buoyancy control regardless of diving position. For single and double (13kg, 18kg, 27kg lift) tank diving.

X-TEK HORSESHOE (HS)

A horseshoe wing with a lift capacity of 27kg for double tanks. With or without bungee system for minimum drag.

X-TEK HORSESHOE TWIN

A double-bladder horseshoe wing with a lift capacity of 27kg or 40kg and a bungee system to minimise drag.

BACK PLATES

X-TEK STAINLESS STEEL BACK PLATE

Delivers optimal stability. Numerous attachment points allow for optional storage pack or other accessories. Weight: 5.3lbs/2.4kg.

X-TEK ALUMINUM BACK PLATE

Perfect travel companion features a stealth black coating. Ultra-light yet extremely stable. Weight: 2lbs/0.9kg.

X-TEK ACCESSORIES

TRAVEL ADAPTER

For Form-Tek Harness, attaches to backplate includes 2 Super Cinch straps.

X-TEK BACK PLATE STORAGE PACK

Storage pack attaches to back plate for additional space to carry accessories.

X-TEK SINGLE TANK ADAPTER

Attaches to back plate for single tank dives. Includes two Super Cinch straps.

QUICK-RELEASE WEIGHT POCKETS

For use with an X-TEK Pure Tek harness or a Litehawk BC.

X-TEK ACCESSORY POUCHES

Waistband pouches with internal D-rings to stow accessories. Two sizes.

X-TEK COUNTERWEIGHT POCKETS

Mount to tank or waistband for optimal weight distribution. Sold in pairs. Each pocket holds 2.2lbs/1kg.

BUOY POUCH

Pouch accommodates surface markers and fits on all X-Tek HS wings. Easy to reach and use in every position. Size adjusts with bungee cord.

SHOULDER PADS

Additional shoulder protection for straps.

CROTCH STRAP

Two inches wide with two stainless steel D-rings.

REEL

With 75m line.

MINI REEL

With 15 or 30m of nylon line and a double-ended stainless steel snap.

BOLT SNAPS

For securing accessories and stage tanks. Made of AISI 316 stainless steel.

WET NOTES

Pocket-sized notebook with plastic pages and a dedicated pencil.

MARKER BUOY

Five feet long with double inflation system and bottom weights for upright stability.

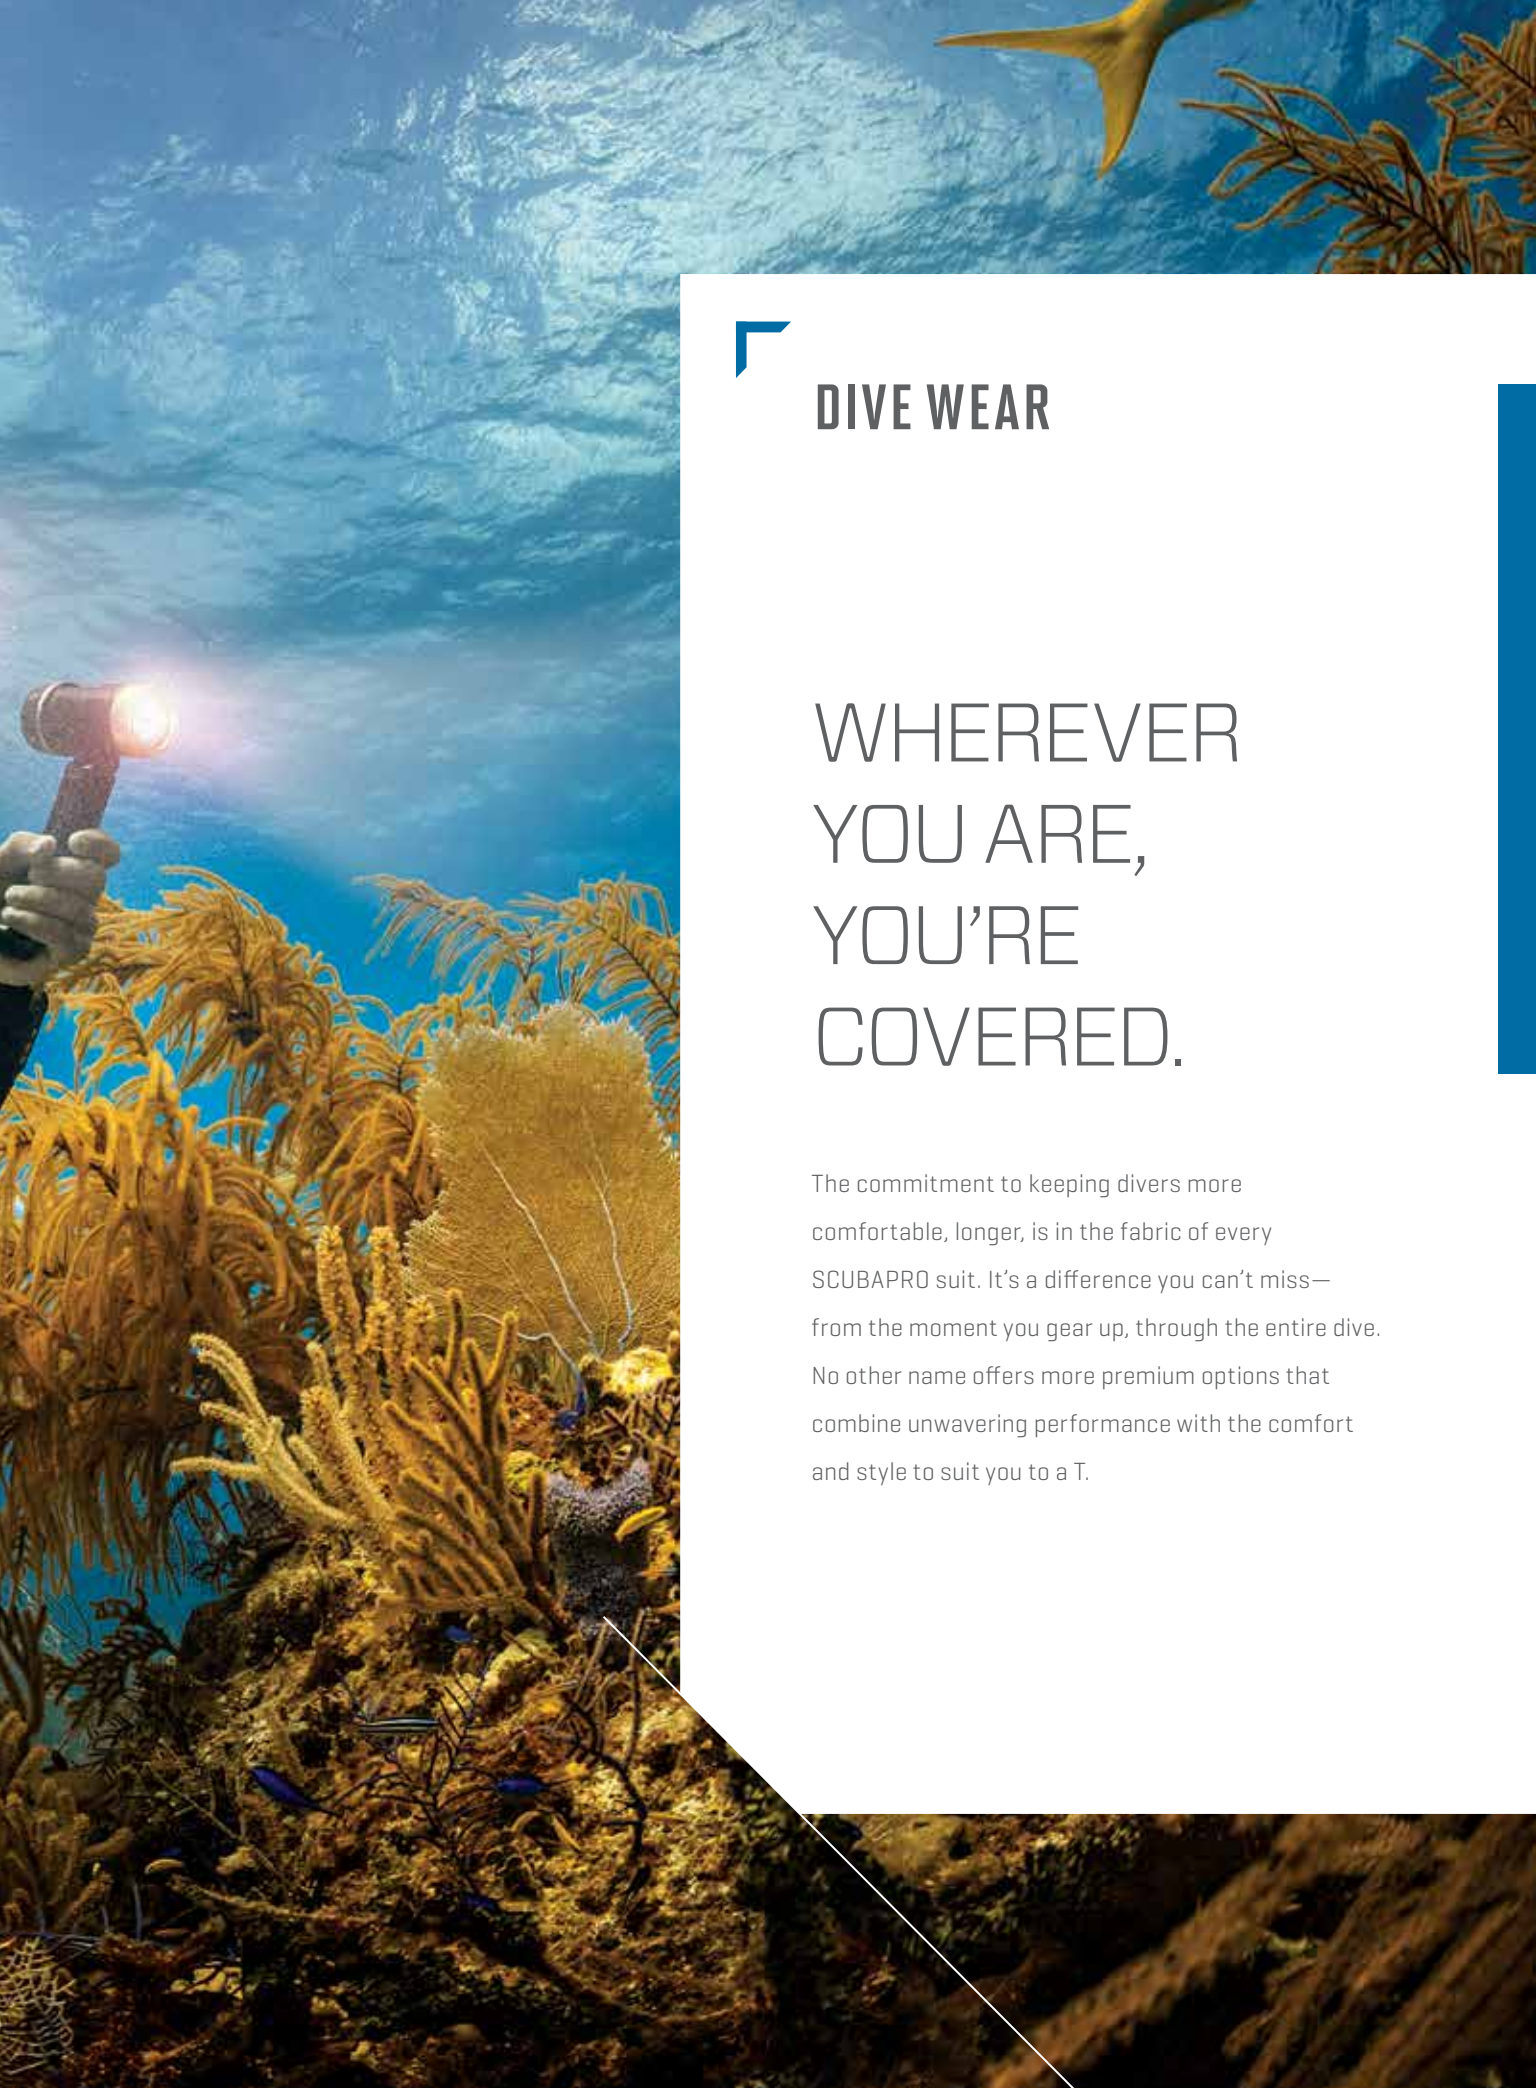
REGULATOR NECKLACE

Flexible, long-lasting band for back-up 2nd stage to ensure a secure and quick recovery.

BOLT KITS

Extra bolts for setting up the optimal X-TEK configuration for your personal use.

CIGARPRO



DIVE WEAR

WHEREVER YOU ARE, YOU'RE COVERED.

The commitment to keeping divers more comfortable, longer, is in the fabric of every SCUBAPRO suit. It's a difference you can't miss—from the moment you gear up, through the entire dive. No other name offers more premium options that combine unwavering performance with the comfort and style to suit you to a T.

PROTECTION, COMFORT & DESIGN.

SCUBAPRO suits set the standard for comfort, style and thermal protection. Unlike other manufacturers, SCUBAPRO engineers suits with the same attention to detail given to other technical gear, with a continued commitment to innovation. That's why SCUBAPRO suits undergo a constant evolution in materials and construction. Each feature on every SCUBAPRO suit is expertly designed and engineered to keep you protected throughout your entire dive, be it in warm equatorial currents or the frigid seas of the Arctic. Whatever the ocean environment demands, SCUBAPRO suits stylishly deliver.

Even more flexibility and comfort

SCUBAPRO cares

X-FOAM - ALL SCUBAPRO NEOPRENE IS X-FOAM

SCUBAPRO was first in diving in 2012 to introduce X-FOAM blend neoprene as part of our ongoing effort to better protect divers.

PETROLEUM FREE made from limestone neoprene.

ONLY FORMULA THAT COMPLIES WITH P.A.H. TESTS ensuring fewer pollutants.

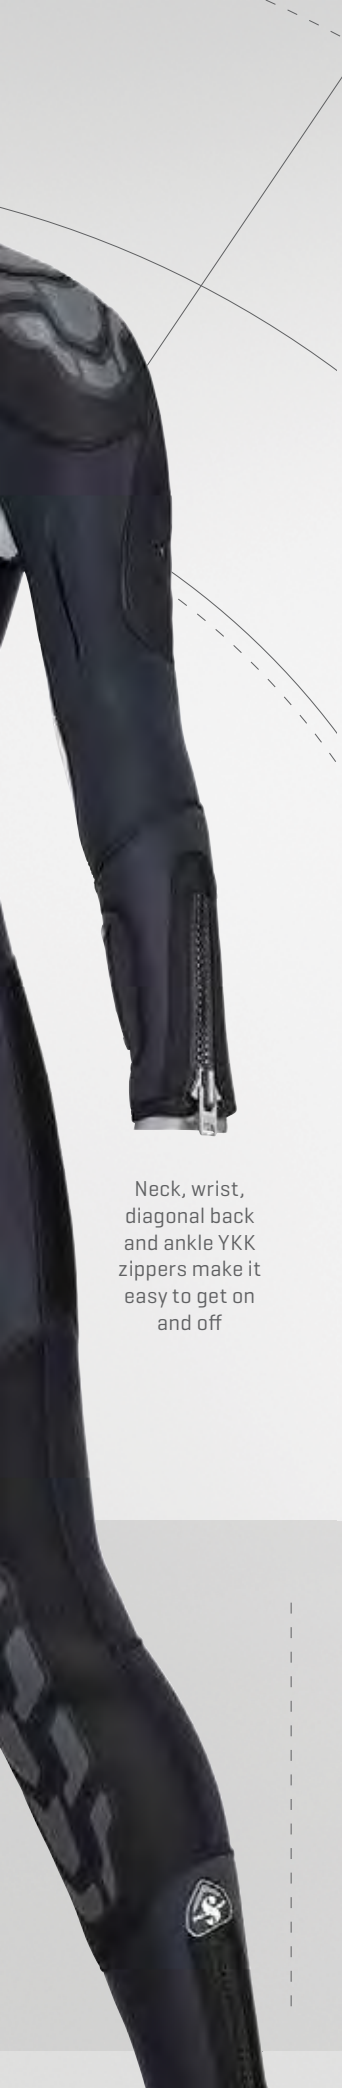
LIGHTER WEIGHT for travel and comfort.

GREATER ELASTICITY increases comfort and mobility.

HIGHER INSULATION EFFICIENCY for better heat retention.

VERY DURABLE for years of diving adventures.

AQUAα™ SCUBAPRO is also the first to introduce solvent-free glue. We've tested it for over 400 hours—and we know it is better for you—and better for the environment. Solvent-free glue is used on our Everflex and Novascotia suits.



Neck, wrist, diagonal back and ankle YKK zippers make it easy to get on and off

SUPERIOR FIT ALL AROUND.

Through an exclusive process called **Body Mapping**, SCUBAPRO designs a more complete suit around your needs. Careful attention is given to material selection by panel, such as utilising Diamond Span and waterproof neoprene coatings that dry quicker. **Body Mapping** also influences the overall location of panels, seaming and zippers. The result is a suit with maximum stretch, better comfort and durability and the best performance possible.

SCUBAPRO also uses unique, thinner materials engineered to perform better than suits using thicker, more traditional materials. All of this ensures a better fit, meaning more warmth and longer suit life.

Strategic, limited panel layouts, that flatter the body and add comfort

SPECIALISED PERFORMANCE FEATURES.

It's the unique details that make a SCUBAPRO suit truly exceptional in comfort and thermal protection.

DIAMOND SPAN LINER: Designed to drain water and dry quickly for added comfort when preparing for repeated dives.

EVERFLEX MATERIAL: A neoprene material produced using X-Foam that is lightweight, flexible and durable.

PROTECTIVE SEALS: Strategically placed to minimise water entry and keep you warmer.

ANTI-ABRASION MATERIAL: Included in all high-stress areas of the suits to ensure lasting quality.

SIZES TAILORED FOR WOMEN: For lasting comfort that feels custom-fit for you.

OTHER WARMTH ESSENTIALS: Spine pads, double collars, zippers with larger flaps and gussets to block water entry enable our suits to test higher in warmth than other suits on the market.

THE WIDEST SELECTION IN THE INDUSTRY.

Wearing SCUBAPRO is the next best thing to having a custom-made suit. The range of size offerings cannot be matched. What's more, all SCUBAPRO suits lead their categories in comfort, thermal protection and overall quality. So whichever one you choose, you're always diving with the best.

DRYSUITS (Laminate/Neoprene)

SEMI-DRY SUITS

WETSUITS

HYBRIDS

PYROFLEX

RASH GUARDS

HUMAN FACTOR DIVING™

Layering Options

Particularly with the new Pyroflex suit, allowing you to take a suit from tropical to colder conditions.

Vast Suit Sizing

Built for a variety of different body types and shapes.

A Suit for Every Dive

From drysuits to semi-drys to a wide range of wetsuits, there is a SCUBAPRO suit for every diver, every dive scenario and every budget.

Thoughtful Details

Such as I-Safe to keep your computer in place, glove/hood retainers on suit legs and more.

DRYSUIT

EXTENDER

Built to last, the Extender is constructed of a high quality and extremely durable trilaminate material to withstand the rigors of years of aggressive diving. Though built tough, the suit is lightweight and offers a number of design features that enable you to achieve a comfortable, streamlined fit. Includes hood, inflator hose and storage bag. Includes attached rubber boots.

EVERTEC LT - TRILAM DRYSUIT

Lightweight, durable and offering a bit of stretch, this high-quality drysuit is made of heavy-duty Rip-stop fabric and comes with a long list of features to keep you warm, dry and comfortable in all water conditions. Included: suspenders, LP hose and a bag for storage or transport. Comes with hood.

ACCESSORIES

EASY DRY PRO GLOVE

Includes glove liner.

DRYSUIT BOOT

Rugged yet flexible.

SUB TECH 490

With high performance 490g hollow fibre insulation.

SUB TECH 100

Drysuit undergarment made in 100g hollow fibre material.

CLIMASPHERE

Drysuit undergarment with suit and vest sold separately.

SUB TECH CLIMASPHERE

All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula, and the only one that complies with P.A.H. tests to better protect divers.

EVERDRY 4 - NEOPRENE DRYSUIT

Enjoy the fit and flexibility of a wetsuit with the thermal properties and watertight seals of a drysuit. The high-density 4mm neoprene resists compression so little to no undergarments are required. Built for extended-wear comfort and convenience, the suit includes inflator hose and bag for storage or transport. Comes with hood.

SCUBALAB 2010 TESTERS' CHOICE

TAUCHER AWARD 2014

EXODRY - NEOPRENE DRYSUIT

Offering a unique approach to drysuit diving, the Exodry fuses 4mm high-density neoprene with latex wrist and neck seals. It's a winning combination, resulting in minimal buoyancy variations, maximum range of motion and an excellent sealing system. Includes attached rubber boots, LP hose and storage bag. Comes with hood.

ACCESSORIES

EASY DON DRY GLOVE

Unisex.

DRY GLOVE SET

For all dry suits with latex cuffs.

All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula, and the only one that complies with P.A.H. tests to better protect divers.

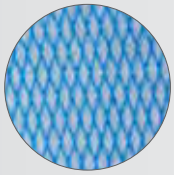
NOVASCOTIA

NOVASCOTIA 7.5MM - SEMI-DRY SUIT

upgraded

Snug-fitting and flexible, the Novascotia keeps you very warm and relatively dry while exploring the depths. With its easy-zip waterproof YKK Aquaseal Vislon zipper, improved plush lining, double zippered seals on ankles and wrists and long list of convenience features, the Novascotia offers the ultimate fit, warmth and durability in cold-water and multi-dive thermal protection.

AQUAα™



OUR UNIQUE BLUE DIAMOND SPAN INNER

LINING WITH WATER DRAINING MATERIAL ISN'T JUST EXCEPTIONALLY COMFORTABLE AND QUICK DRYING. IT ENHANCES COLD WATER PROTECTION, KEEPING YOU WARMER, LONGER.

X-Foam

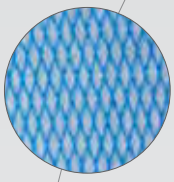
All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula and the only one that complies with P.A.H. tests to better protect divers.

EVERFLEX

The Everflex line features a wide selection of suits that deliver superb fit and thermal protection—including styles and thicknesses to match any dive. Every inch of these full-featured suits has been carefully considered, from materials to seams and seals, and even panel location—finished with little touches that make your dive experience more comfortable and even more enjoyable.

Pure Design Concept

Utilises fewer seams and panels of varying thickness to deliver superior warmth, flexibility and fit.

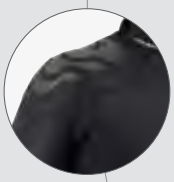


Advanced Thermal Lining

Diamond Span water-draining interior lining enhances cold-water protection.

YKK Zippers

Offers increased long-term durability and ease of use with KA brass sliders.



Abrasion-Resistant Materials

Heavy-duty reinforced shoulder and knee areas with abrasion-resistant seat ensure durability.

Everflex Neoprene

Provides added durability and sheds water, allowing it to dry quickly.

X-FOAM

Made from limestone neoprene, petroleum-free and compliant with strict PAH requirements. SCUBAPRO was the first to offer this, better protecting divers.

Solvent-Free Glue

The first to use AQUA glue—a solvent-free, water-based adhesive that is environmentally and diver-friendly.

A perfect fit for any diver with a range of sizes for both men and women.

SCUBAPRO cares

EVERFLEX

EVERFLEX STEAMERS

upgraded

These ultra warm and comfortable steamers are built with 100% Everflex neoprene and incorporate SCUBAPRO's exclusive Pure Design Concept using fewer panels and seams, allowing maximum stretch for extreme freedom. All 2017 Everflex steamers come with a Diamond Span water-draining inside lining that features a second lining for improved stretch and cold-water protection. Suits are also assembled using a new and innovative solvent-free water-based glue, a major step towards a truly green wetsuit.

7/5mm, 5/4mm and 3/2mm thicknesses.

SCUBAPRO cares

HYBRID

HYBRID 6MM VEST

This versatile vest is designed to look great with all our suit families. Removable hood with durable zipper.

SCUBAPRO DESIGNED FOR WOMEN

HYBRID SHORTY 2MM

Make a fashion statement in and out of the water with this sleeveless, beautiful design. This unique one-piece suit is perfect for warm-water snorkelling or other water sports.

X-Foam

All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula, and the only one that complies with P.A.H. tests to better protect divers.

PYROFLEX

When it comes to thermal protection nothing beats neoprene, and the Pyroflex takes that to heart. This revolutionary dive suit design features an outer layer made from a special water-repellant, high-stretch 1.5mm Everflex neoprene and an inner layer of high-tech fleece and plush. This combination delivers outstanding warmth plus is comfortable and dries quickly. You won't find better thermal protection for tropical diving, snorkelling or pool training.

PYROFLEX STEAMER

Warmth, comfort and lots of stretch for excellent range of motion, plus a slightly higher neck collar to protect against BC chafing. A premium YKK zipper makes donning and doffing easy, and thumb loops and heel stirrups prevent ride-up.

100% EVERFLEX NEOPRENE OUTSIDE

Made with X-Foam, this durable, quick-drying neoprene keeps you comfortable with highly efficient insulation for performance and maximum stretch. It's also the only neoprene formula that complies with strict PAH test requirements.

Find your perfect fit. The range of sizes offered by SCUBAPRO can't be matched.

PYROFLEX RASH GUARDS

Super-comfortable long rash guards keep divers and snorkellers warm while spending long periods of time in the water. With thumb loops and high-cut collars, they are also great for layering.

For sizing and more details, visit SCUBAPRO.com.

DEFINITION

DEFINITION STEAMERS 6,5MM

This tough 6.5mm wetsuit includes a 3D cut, special tailoring and material inserts to give a suit that fits the body like a glove, provides extra stretch where it's needed most and offers a level of warmth, comfort and durability well-suited to active cold water divers. Spine pad cushions the tank, providing additional comfort during extended dives.

6,5MM

HEAT SHIELD

Warms you up with the Infrared Fleece Technology. Built in the Definition 6.5mm and 5mm.

DEFINITION VEST 6MM

Thermal protective jacket with attached hood.

All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula, and the only one that complies with P.A.H. tests to better protect divers.

DEFINITION STEAMERS 3MM/5MM

User-friendly wetsuits use a 3D cut and special tailoring to fit the body like a glove, provide extra stretch where needed and enhance warmth and comfort. Accent colours vary on suits based on thickness.

Men 3mm // Yellow

Women 3mm // Pink

5MM

DEFINITION SHORTY 2.5MM

A must-have dive suit for tropical divers everywhere, this stylish shorty is lined with titanium plush and offers warmth, flexibility and comfort. It's a great choice for layering too.

PROFILE SHORTY 2.5MM

These shorties will be your steady companion for all your diving and snorkelling activities. Elegantly cut and styled, built in durable, fast-drying nylon and two-sided X-Foam neoprene, Profile shorties provide maximum comfort at all levels.

For sizing and more details, visit SCUBAPRO.com.

Backed with neoprene.

All SCUBAPRO neoprene is constructed with X-FOAM, a petroleum-free limestone neoprene formula, and the only one that complies with P.A.H. tests to better protect divers.

ESSENTIALS

A NATURAL EXTENSION OF YOU.

Your fins, mask and snorkel should feel custom-engineered for you. That's why SCUBAPRO has crafted a wide selection of each, reinforced with top-quality materials for ultimate performance. It's the perfect fit for those who want to go further, see more and loose themselves in the experience.

FINS

SEAWING NOVA GORILLA

A slightly stiffer blade results in increased power and control for divers who prefer more feedback in their kicks. It also allows for more effective sculling and reverse kicking, making the Gorilla an excellent choice for tech divers and dive instructors.

SCUBALAB 2010 TESTERS' CHOICE

BUNGEE STRAPS

ADJUSTABLE

FULL FOOT

SEAWING NOVA

The multiple-award-winning Seawing Nova delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort, speed and efficiency of a split fin. You'll be hard-pressed to find a fin more comfortable to wear or fun to kick.

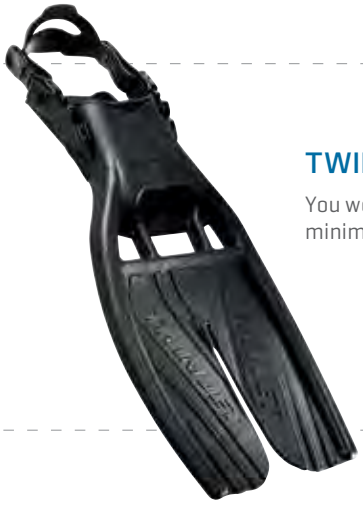
SCUBALAB 2013 TESTERS' CHOICE

TWIN JET MAX

This high performance fin features a slightly stiffer blade for split fin divers who like more feedback in their kicks.

WITH STANDARD STRAPS
OR SPRING STRAPS



TWIN JET

You won't find a better provider of maximum propulsion with minimum kicking effort than the Twin Jet. This fin is just fun.

SPRING STRAPS

JET FIN

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965 and continue to be immensely popular today.

BUNGEE STRAPS

SPLIT FIN XP

The famous nature wing technology. With three different materials for higher efficiency and great optical characteristics. Enjoy the extremely comfortable foot plate for optimum power transmission. Including Bungee Straps.

JET SPORT

The Jet Sport generates propulsive kicking power with excellent stability. It's easy to maneuver too, delivering the perfect blend of performance, comfort and price.

FULL FOOT

ADJUSTABLE

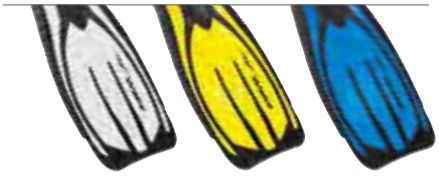
ADJUSTABLE

FULL FOOT

WAKE

Offering dual-material construction and a traditional blade, this fin is lightweight, comfortable and perfect for travel.

ADJUSTABLE



GO FIN

new / travel friendly

Lightweight, comfortable and virtually indestructible, GO fins are travel-friendly and fun to use— making them the ideal fins for divers seeking experiences around the world.

SOLD AS STANDARD WITH BLACK STRAP ON ALL SIZES. COLOURED STRAPS ARE AN OPTIONAL ACCESSORY.

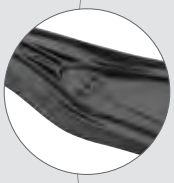
GO FIN

new

The perfect addition to the SCUBAPRO fin range, the GO dedicated travel fin has been designed from the ground up, offering a superior blend of durability, portability and performance. Lightweight, comfortable and virtually indestructible, GO fins are travel-friendly and fun to use—making it the ideal fin for divers seeking experiences around the world.

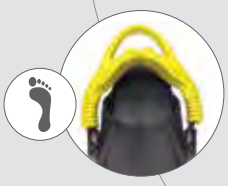
Versatile Fit

Available in versatile crossover sizes, fitting a wide range of feet sizes, complete with self-adjusting bungee heel strap.



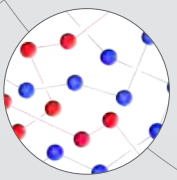
Power in any Water Condition

Power bars under the rails prevent overflex to maintain the optimum angle of attack under high load conditions.



Barefoot Design

The GO's design combines the fit of an open heel fin, with the comfort and barefoot freedom of a full foot fin.



Monprene® Construction

100% Monprene® eliminates broken blades, de-lamination and torn foot pockets—making it ideal for long-term, heavy-duty use.

Extremely Lightweight

Lightweight design makes travelling more convenient and use in the water easier and more comfortable.

High Performance

The 25-degree pre-angled blade includes a central power panel, providing longitudinal rigidity and creating a channelling effect.

Travel-Friendly

Designed to fit easily in IATA carry-on compliant luggage, the Piggy Back Stack System makes packing and travelling even easier.

JET CLUB

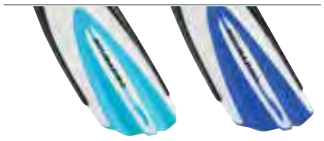
new

The new Jet Cub full foot fin comes with an ergonomic foot pocket that lets you enjoy remarkable foot comfort while benefiting from impressive kicking performance. The fin's big blade generates lots of power, while its vented design and three-material construction help maximise thrust and maneuverability and minimise leg strain.

FLUIDA

new

Timeless classic design full foot fin. Excellent thrust due to the streamlined shape. Matches to Pantai snorkelling set. Brillant price-performance ratio.



SNORKEL PLUS

Open heel snorkelling fin, made to fit the bare foot perfectly but also suitable for neoprene boots.

SYNERGY 2 TRUFIT

Essential to any dive adventure, a superior mask must provide an expansive field of view, keep water out and—most importantly—it must be comfortable during extended periods under water. SCUBAPRO's Synergy 2 Trufit masks hit all of these targets, but where they really shine is comfort. The key is the next-generation Trufit skirt, an innovative double skirt design that combines two skirts and materials to help you truly feel at one with the underwater environment.

The Trufit Advantage

The main skirt is made of thin, soft silicone for a better seal and added comfort. The top skirt is thicker and more rigid to provide support. The unique ribbed texture system molds to the contours of most faces.

Tested Performance

Tested by demanding divers and fine-tuned to perfection.

Adjust at Will

Push-button buckles attach to the skirt, not the frame, optimising strap angle and range of motion when dialing in fit.

See in Full Color

Ultra clear lens prevents colour distortion and provides brighter vision. Mirrored lens option reduces glare.

Enhanced Field of Vision

Synergy 2's lens design provides excellent field of view—both horizontally and vertically.

Designed For Travel

Flexible button tabs enable the mask to pack flat for travelling.

ULTRA CLEAR LENSES

Regular glass has a slight greenish tint, resulting from impurities in the glass. The influence on vision is not substantial; however, under low light conditions this can distort colours and reduce light transmission. With the Ultra-Clear Lenses from SCUBAPRO you can be sure you have the best possible vision under water – in full colour! Something you won't want to do without in the future!

TRUFIT

SYNERGY 2 TRUFIT

The single lens Synergy 2's new-generation Trufit two-skirt design delivers a long-lasting, comfortable seal on virtually all face shapes.

Ultra Clear

Ultra Clear

SYNERGY TWIN TRUFIT

new colours

2nd generation Trufit technology uses two thicknesses of supple silicone to create a comfortable, watertight seal.

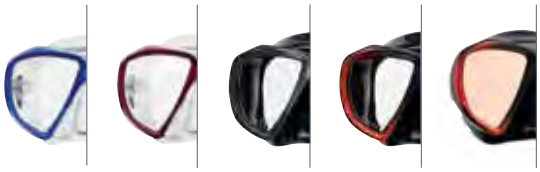
TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt technology, benefiting from three generations of design and development, forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit Technology mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

TWIN LENS

SPECTRA

A metallic-look frame, dual lens mask. Exclusive paint process gives your mask the look of stylish eyewear. With optional optical lenses in -1.5 to -4.5.



Ultra Clear

Ultra Clear

SPECTRA MINI

The Spectra Mini shares the same features as the twin lens Spectra mask, but is smaller in size.

VIBE 2

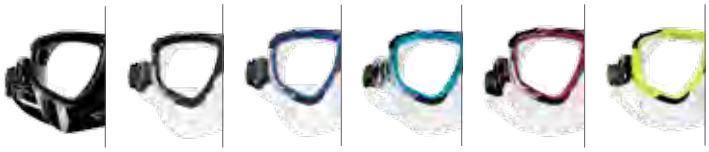
new colour

Double lens mask with increased field of vision. Includes EZ-Mask strap for central adjustment and an additional standard mask strap.

Ultra Clear

ZOOM

Made of a soft clear silicone with a very small dead space and a superb comfortable fit. Easily retrofit with optical glasses in: -1.5 to -8 & +1.5 to +4.



ECCO

The perfect mask for snorkelling. A two lens mask with low volume, liquid silicone and an universal fit.

PRO EAR 2000

Offering a sensational concept for ear protection while diving, the ProEar mask comes with ear cups to keep your ears dry while at the same time allowing for easy equalising during descents.

FUTURA 1

A SCUBAPRO classic, the smallest volume mask out there.

SINGLE LENS

FRAMELESS GORILLA /FRAMELESS

Diving's original frameless mask features a distinctive rectangular shape for excellent field of view. The skirt's soft double-edge seal keeps water out and feels good against the skin. Gorilla features a larger skirt.

FRAMELESS GORILLA

FRAMELESS

CRYSTAL VU

A single lens mask with seamless side windows for a panoramic field of vision.

Ultra Clear

SOLO

Enjoy the view in a streamlined, low-volume frameless mask. Double-sealed silicone skirt molds to the face for a comfortable, watertight seal.

Ultra Clear

TRINIDAD 2

Unique system of assembling lens and skirt without any frame, with extremely low volume.

DEVIL

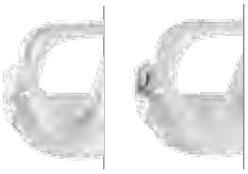
Offering excellent field of vision and a super-soft silicone skirt, the design of the nose pocket makes it easy to equalise.

Ultra Clear

Ultra Clear

GHOST

Low-volume frameless mask fits comfortably and offers a superb field of view. With easy-adjust buckles.



SPECIAL MASK

FULL-FACE MASK

Professional-quality mask is designed for diving in cold water, wrecks or caves and technical diving. It is widely used by military and commercial divers worldwide.

SNORKEL SETS

CURRENTS COMBO PRO

Clear silicone skirt with twin lens and vented flex snorkel with splash guard make this an universal set for diving and snorkelling. Available in blue and yellow.

PANTAI COMBO SET

Performance mask and snorkel set with a low volume performance mask. Includes the valve snorkel Vent 2. Packaged in an handy net bag.

MASK ACCESSORIES

GO PRO MASK MOUNT

Lightweight GoPro® mask mount fits virtually every double lens mask on the market and is easy to install and remove.

ENLARGED TO SHOW DETAIL.
MOUNT FITS ON TOP OF MASK.

OPTX 20/20 PLUS LENSES

Stick-on magnifying lenses. Makes it easy to read your underwater gauges, just add water and they stick.

NEOPRENE MASK STRAP

No more tangled hair and twisted headbands.

VELCRO MASK STRAP

SNORKELS

SPECTRA DRY

Large-bore tube allows plenty of airflow. Dry top closes when submerged so no clearing is needed upon resurfacing. An efficient purge valve expels any water that might seep in. The flexible lower tube hangs down and out of the way when not being used.

SPECTRA

A large-bore tube with a semi-dry top design to keep water from entering the tube. Available in various metallic colours. Coordinated with the SPECTRA mask it features an efficient purge valve and a regulator style mouthpiece for added comfort

ESCAPE

A large-bore snorkel with a semi-dry top design to keep water from entering the tube. Includes an efficient purge valve, a regulator-style mouthpiece for added comfort, and a quick-release removable clip.

FUSION DRY

A very modern and comfortable dry snorkel with a handy flexible drop away construction in flexible silicone. With water drain valve and effective splash guard.

FUSION PRO

Modern design features a splashguard top and a lower flex hose. The comfortable silicone mouthpiece is interchangeable.

FUN 2

This standard snorkel comes with a silicone mouthpiece and a high-visibility orange top. Durable and easy to use.

VENT 2

Basic solid barrel snorkel with a silicone mouthpiece, purge valve and splash guard.

ACCESSORIES

BUILT FOR THE ADVENTURE.

SCUBAPRO is your trusted travel partner, in and out of the water. Complete your experience with bags that go the distance, knives that give you an edge, and LED lights that truly shine. Every piece is built to withstand baggage claim, the beach, and any other adventure you can pack in.

BAGS

XP PACK DUO

Huge main compartment includes two mesh pockets for smaller items, plus a zippered front-cover sleeve provides quick-access stowage. Telescopic tow handle and durable wheels allow for near-effortless rolling.

Dimensions //
31.5x19.3x16.9in/80x49x43cm
Weight // 10.0lbs/4550g
Volume // 44.6gal/168L

PORTER BAG

A foldable wheeler with extra-large volume for all your gear. Includes integrated wheels, backpack system, corrosion-resistant U-shaped zipper, two front and two inside pockets and reinforced bottom. The bag folds in on itself for easy storage.

Dimensions //
33.5x21.6x13.8in/85x55x35cm
Weight // 5.6lbs/2550g
Volume // 43.3gal/164L

Folded dimensions //
20.4x16.1x6.7in/51x41x18cm

ECCO ROLLING

Back pack system if you need to walk and carry your bag. Top end & side smooth handles for easy carrying.

Dimensions //
32x20x11in/80x45x28cm
Weight // 6.7lbs/3050g
Volume // 34gal/129L

CABIN BAG, 4 WHEELS new

This new Cabin Bag sports four wheels, making it more luggage-like, more versatile, more user-friendly and the ideal roller carry-on bag for travelling.

Dimensions //
23x14x8.75in/58.4x35.5x22cm
Weight // 7.2lbs/3250g
Volume // 10.8gal/41L

REPORTER BAG

new

The rear compartment is ideal for clothes, the middle compartment is designed for a laptop, e-tablet, documents and magazines (with a special pocket for passport and boarding passes) and the front compartment is designed to stow items like digital cameras.

Dimensions //
20.5x15x9.5in/52x38x24cm
Weight // 2.4lbs/1070g
Volume // 11.6gal/44L

DUFFLE BAG

This heavy-duty traditional duffle-style bag is built tough. While weighing only two pounds empty, it provides enough volume to accommodate a full set of dive gear. It is also easy to load and unload thanks to its U-shaped double slider zipper.

Dimensions //
31.5x15.8x13.8in/80x40x35cm
Weight // 2.0lbs/900g
Volume // 24.6gal/112L

DRY BAG 120

improved

This versatile dry duffle is made of heavy-duty PVC (Tarpaulin) fabric, with large main compartments offering substantial stowage capacity. Included: carry straps that convert into a backpack system.

Dimensions //
33.5x15.8x13.8in/85x40x35cm
Weight // 5.7lb/2600g
Volume // 26.2gal/119L

30L DRYBAG BACKPACK

Heavy-duty PVC (Tarpaulin).

Dimensions //
19.5x11.8x7.8in/50x30x20cm
Weight // 2.1lbs/950g
Volume // 7.9gal/30L

KNIVES

K6

15.5cm stainless steel blade offers smooth and serrated edges plus line-cutting notch. Includes injected molded sheath.

K5

A classic 11cm stainless steel blade.

MAKO

Compact dive knife offered in stainless steel or titanium. With 8.5cm blade.

WHITE TIP

Excellent 6.4cm cutting edge. Stainless steel blade resists surface oxidation. Includes locking sheath and BC/hose attachment.

X-CUT

6.3cm titanium blade retains sharp serrated and smooth cutting edges for corrosion-free performance. Sheath fits tech harness waistbands.

SportDiver EDITOR'S PICK 2009

SCUBALAB TESTER'S CHOICE 2015

SK75 TITANIUM

Made of lightweight, corrosion-free titanium, this compact knife features a 7.5cm blade and an easy-grip handle with an eye to attach a security lanyard. It's the perfect cutting tool for attaching to a BC.

SK "T" TITANIUM

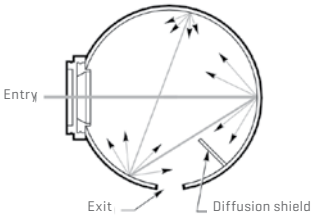
Titanium knife with patented sheath mechanism and exclusive design.

SK21

A comfortable knife with a well formed grip with SoftTouch inlay and a 12cm blade.

LIGHTS

LED lights are the dive lights of choice among today's divers and none compare to SCUBAPRO's Novalights. Light years ahead in dive light design, Novalights are equipped with high-intensity LEDs that far outpace the competition in brilliant lumen illumination, they are machined from heavy-duty aluminum, making them both light-weight and built to last and they offer multiple power modes and safety features that rank best in class. Nothing lights up a dive like a Novalight.



All SCUBAPRO lights are measured in an integrating sphere and offer real lumens.

NOVA 2100 SF

Powerful new multi-use dive light comes with both wide and narrow beams plus five light modes and emergency signal modes to perfectly match any diving situation.

NOVA 720/ NOVA 720R

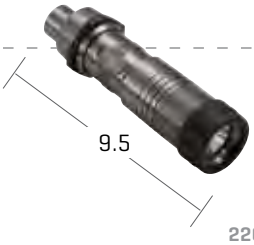
Newest Cree XPL LED. 100% or 50% power modes. Choose from full-sized 720 (3 C cells) or compact 720R (rechargeable Li-ion). Batteries sold separately.

NOVA 720 WIDE/NOVA 720R WIDE

Same 720 lumen illumination and features, with Cree XML U2 LED and wider 80-degree beam. Batteries sold separately.

NOVA 200

Compact, lightweight aluminum LED light with rated output of 200 lumens. Up to 3.5 hours of high intensity light with 3 AAA alkaline batteries.



NOVA 220

Just 9.5cm long, it can be stored in the smallest BC pocket. Three power modes: 100%, 25% and Flash. Output of 220 lumen. Powered by CR123 batteries (not included).

NOVA 2100 SF (SPOT FLOOD)

new

SCUBAPRO has long been the leader in underwater illumination with our pocket and accessory lights. In addition to being rugged and reliable, all SCUBAPRO Nova series dive lights offer true lumen ratings, and all but the Nova 200 are equipped with over-pressure release valves. Following in this tradition, the new Nova 2100 SF brings substantial advancements to the primary/video light market. This powerful dual beam light (2100 lumen 65° wide beam and 800 lumen 15° spot beam) provides the power to light up any dive scenario. Delivered with numerous accessories, the Nova 2100 SF provides options to evolve your experience and diving pleasure.

Body Material

Anodized aluminum light head with fiber-reinforced polycarbonate body.

Long-Lasting, Reliable Power

Powerful 25W Li-Ion removable battery provides 55 minutes of burn time at full power and constant brightness. Depth tested to 100m/328ft for reliable lighting.

Quality Cree LEDs

Wide beam features six Cree XM-L2 LEDs and spot beam features one Cree XPL LED.

One-Button Operation

Power on and off, adjust brightness and switch beam angle by pushing one button.

Five Primary Light Modes

Options include:
100% Flood, 50% Flood, 100% Spot,
50% Flood + 75% Spot and
25% Flood + 50% Spot.

Emergency Mode

Hidden emergency signal mode offers a one-second blink interval or an SOS Morse code.

Safety and Reliability

Corrosion-proof metal light head improves heat dispersion and increases durability. The completely isolated battery compartment protects internal electronics from water intrusion.

A Full Light Set

Includes a large and small Goodman handle, pistol grip handle, GoPro® adapter, rechargeable battery, charger and spare parts—packed into a zippered carry case.

Accessories

Ball joint adapter

YS adapter

ACCESSORIES

VISUAL & ACOUSTIC SIGNAL DEVICES

SAFETY & FUN

Combination safety, ideal for snorkellers.

SAFETY BUOYS

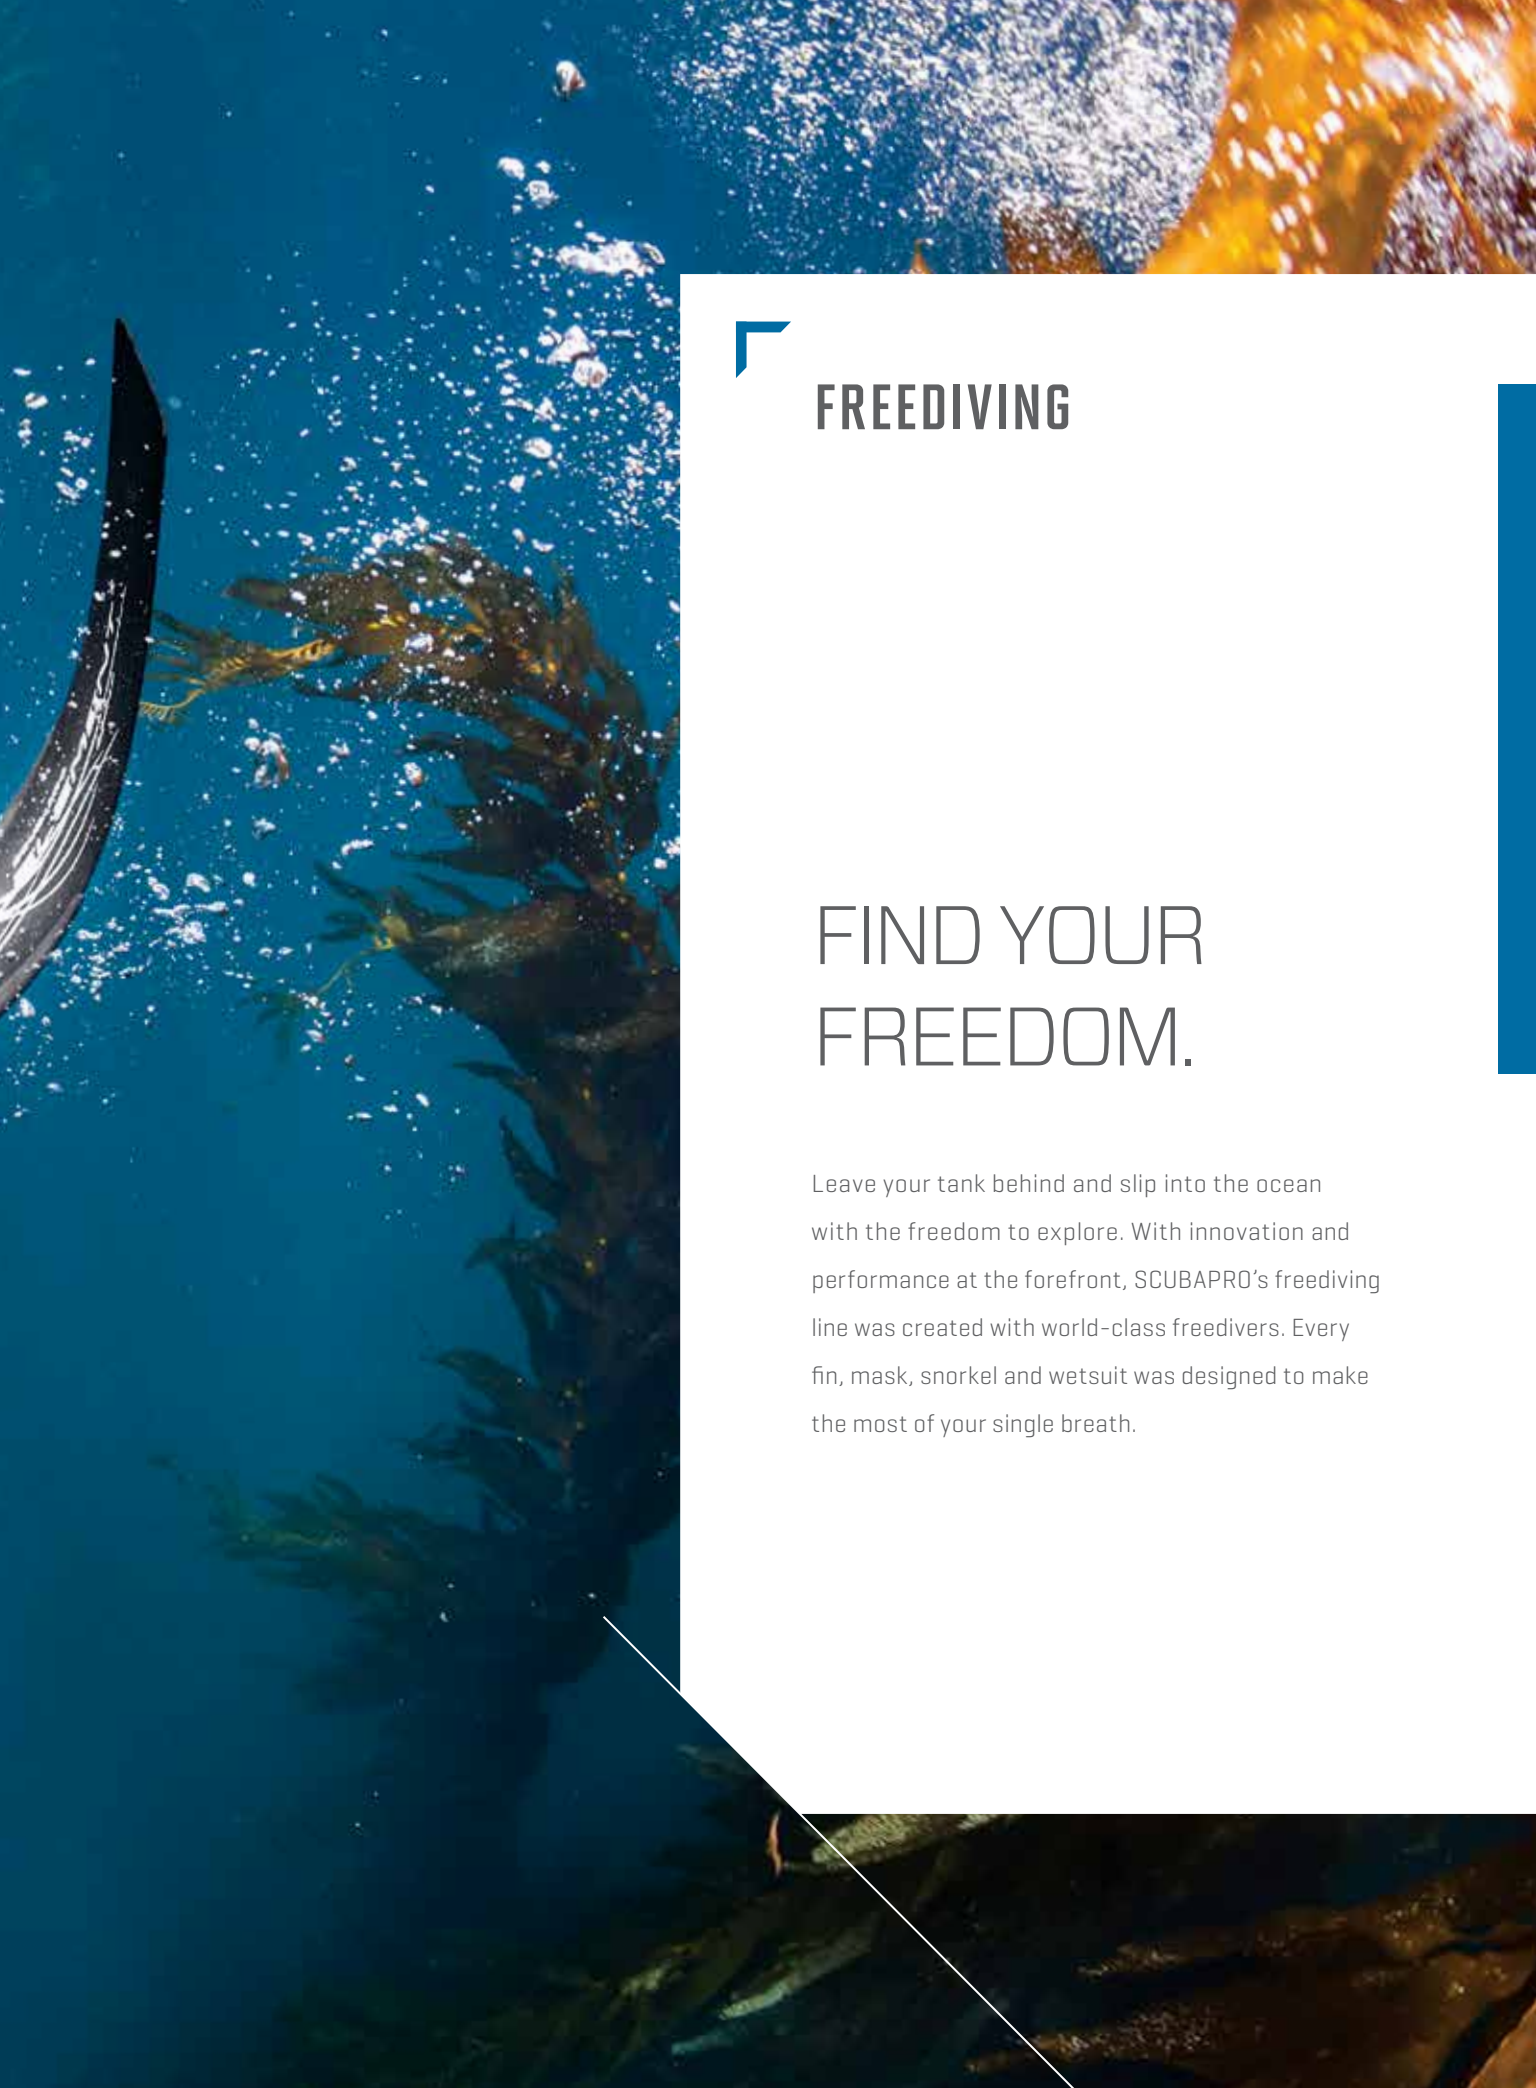
SCUBAPRO CAP

SCUBAPRO MUG

Start your day with a coffee and SCUBAPRO.



FREEDIVING

FIND YOUR FREEDOM.

Leave your tank behind and slip into the ocean with the freedom to explore. With innovation and performance at the forefront, SCUBAPRO's freediving line was created with world-class freedivers. Every fin, mask, snorkel and wetsuit was designed to make the most of your single breath.

FREEDIVING

SCUBAPRO's impressive line-up of freediving gear is like no other. Created in collaboration with some of the world's best freedivers, SCUBAPRO lives up to its premium reputation by delivering sleek hydrodynamic designs, high tech materials and expert craftsmanship. No matter what kind of freediving interests you, our gear line is engineered to take you there... faster, deeper and longer.

TRYGONS

Developed by SCUBAPRO in partnership with the world-record-setting fin manufacturer, Trygons, these new state-of-the-art carbon fins deliver the ultimate in comfort and kicking performance at any skill level.

S1

Highest quality, 99-percent pure carbon blade, produces the most powerful and efficient fin on the market. Exceptional power recovery and unparalleled performance, the unique design reduces turbulence and drag forces.

S2

Built with a carbon layer over a fiberglass core, the S2 delivers kicking performance comparable to the S1, but at a value price. 50 percent carbon fiber.

S3

Long, soft blade made of a high performance plastic compound. Generates power and speed while maintaining excellent energy efficiency. Durable and affordable. Great option for scuba divers too.

MONOFIN

Constructed of same materials as S2, the soft foot pockets, blade action and double-wide shape generate exceptionally powerful kicking performance and comfort. 50 percent carbon fiber.

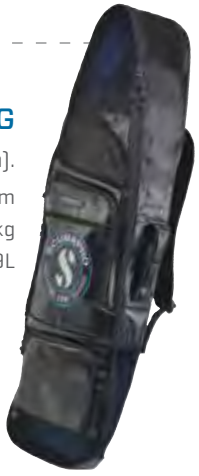
FREEDIVING BAG

Heavy-duty PVC (Tarpaulin).

Dimensions // 94x26x16cm

Weight // 0.4kg

Volume // 39L



MONOFIN BAG

Transport your Monofin with ease. Made from 100% water-resistent Tarpaulin with backpack straps for hands-free carrying.

UNELASTIC STRAPS

For S1, S2 and M1 Freediving Fins. To fine-tune the fit of the foot pocket and to improve power transfer in competitions. Just slip over the foot pocket.

STEEL PRO

Frameless, single lens design offers an expansive, low volume view. Streamlined and lightweight, its soft silicone skirt provides a comfortable, watertight seal. Perfect for freediving or scuba diving.

STEEL COMP

Ultra-low internal volume makes equalising easy. Mask compresses on descent so equalisation is not required as often. Preferred by deep divers. Not recommended for scuba diving.

STEEL

Double lens mask with very low volume . With universal fit for freedivers and scuba divers.

NOSE CLIP

Lightweight aluminum, adjustable.

FREEDIVING SURFACE BUOYS

Heavy-duty, durable construction.

FREEDIVING BELT

Length // 150cm
Width // 4.6cm

MARSEILLE

STANDARD

FREEDIVING SNORKEL

Ultra-flexible, removable upper barrel. Folds easily for storage.

SCUBAPRO
DEEP DOWN

KIDS

LIFELONG PASSION BEGINS HERE.

Keeping kids comfortable, confident and safe in the water starts with the right gear. SCUBAPRO offers a complete line of snorkelling and diving equipment built around young divers' needs. And for parents, there's no better peace of mind than seeing your children wearing the best name in the business.

KIDS

SCUBAPRO's line of kid's equipment is the same high quality, durability and materials as our adult gear. Designed to address the unique fit and performance needs of children, SCUBAPRO ensures their first underwater experiences are unforgettable.

All products are guaranteed to be non-toxic and phalate-free!

REBEL 2.5MM & 6.5MM

Back-zip steamer delivers warmth, flexibility and a comfy plush interior.

REBEL VEST 5MM

For added warmth and protection.

REBEL SHORTY 2MM

2mm kids shorty in a cool, modern design, stretch panels on the sides.

REBEL HOOD 5MM

Protects head and neck. Velcro closures make it simple to put on and take off.

REBEL GLOVES 3MM

Super stretch, plush neoprene, large gusseted Velcro® flap. Easy for kids to open and close.

RASHIE

Shorts and tops sold separately.

SUPER SOXX

Children's boots with flexible sole and adjustable top.

KAILUA

Breathable walker for beach and boat.

NO ZIP

Velcro closure easy-in boots.

MK2 EVO/R095

The perfect regulator for your young diver. The MK2 EVO/R095 is lightweight and easy breathing. With shorter hose and smaller mouthpiece. Invest in a regulator that will grow with your young diver.

REBEL BCD

Built tough to withstand many dive seasons and multiple growth spurts, a choice of inter-changeable cummerbunds and adjustable length shoulder straps ensures the perfect fit as a young diver grows.

CHILD 2

Perfectly shaped to fit small faces. Extra soft non-allergic silicone skirt and Ultra Clear lenses.

MINI VU

Top mask for kids, juniors and those with smaller faces. With extra soft non-allergic liquid silicone.

SPIDER SET

This high-quality children's snorkelling set comes with a single lens mask complete with soft silicone skirt, a comfortable snorkel with splashguard and lower purge valve.

CHILD 2

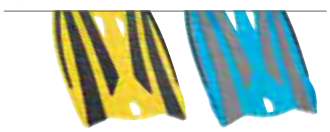
Kid-sized snorkel with silicone mouthpiece and high visibility splashguard to keep water out.

MINI DRY

Dry snorkel for perfect water fun. Soft, non allergic silicone mouthpiece with purge valve.

SNORKEL PLUS

Open heel snorkelling fin, made to fit the bare foot perfectly but also suitable for neoprene boots. Very easy to put on and take off and comfortable to wear. Each size fits a wide range of foot sizes.



FLUIDA

Timeless classic design full foot fin. Excellent thrust due to the streamlined shape.

SCUBAPRO cares

For over 50 years, SCUBAPRO has been committed to protecting the oceans. From manufacturing processes and materials to reusable packaging to sponsoring conservation efforts, we at SCUBAPRO believe we have a strong responsibility to the very environments we love to explore.

SUSTAINABLE PRODUCTS

We encourage new and seasoned divers to not just dive in, but to experience, discover and protect the oceans. And we lead by example.

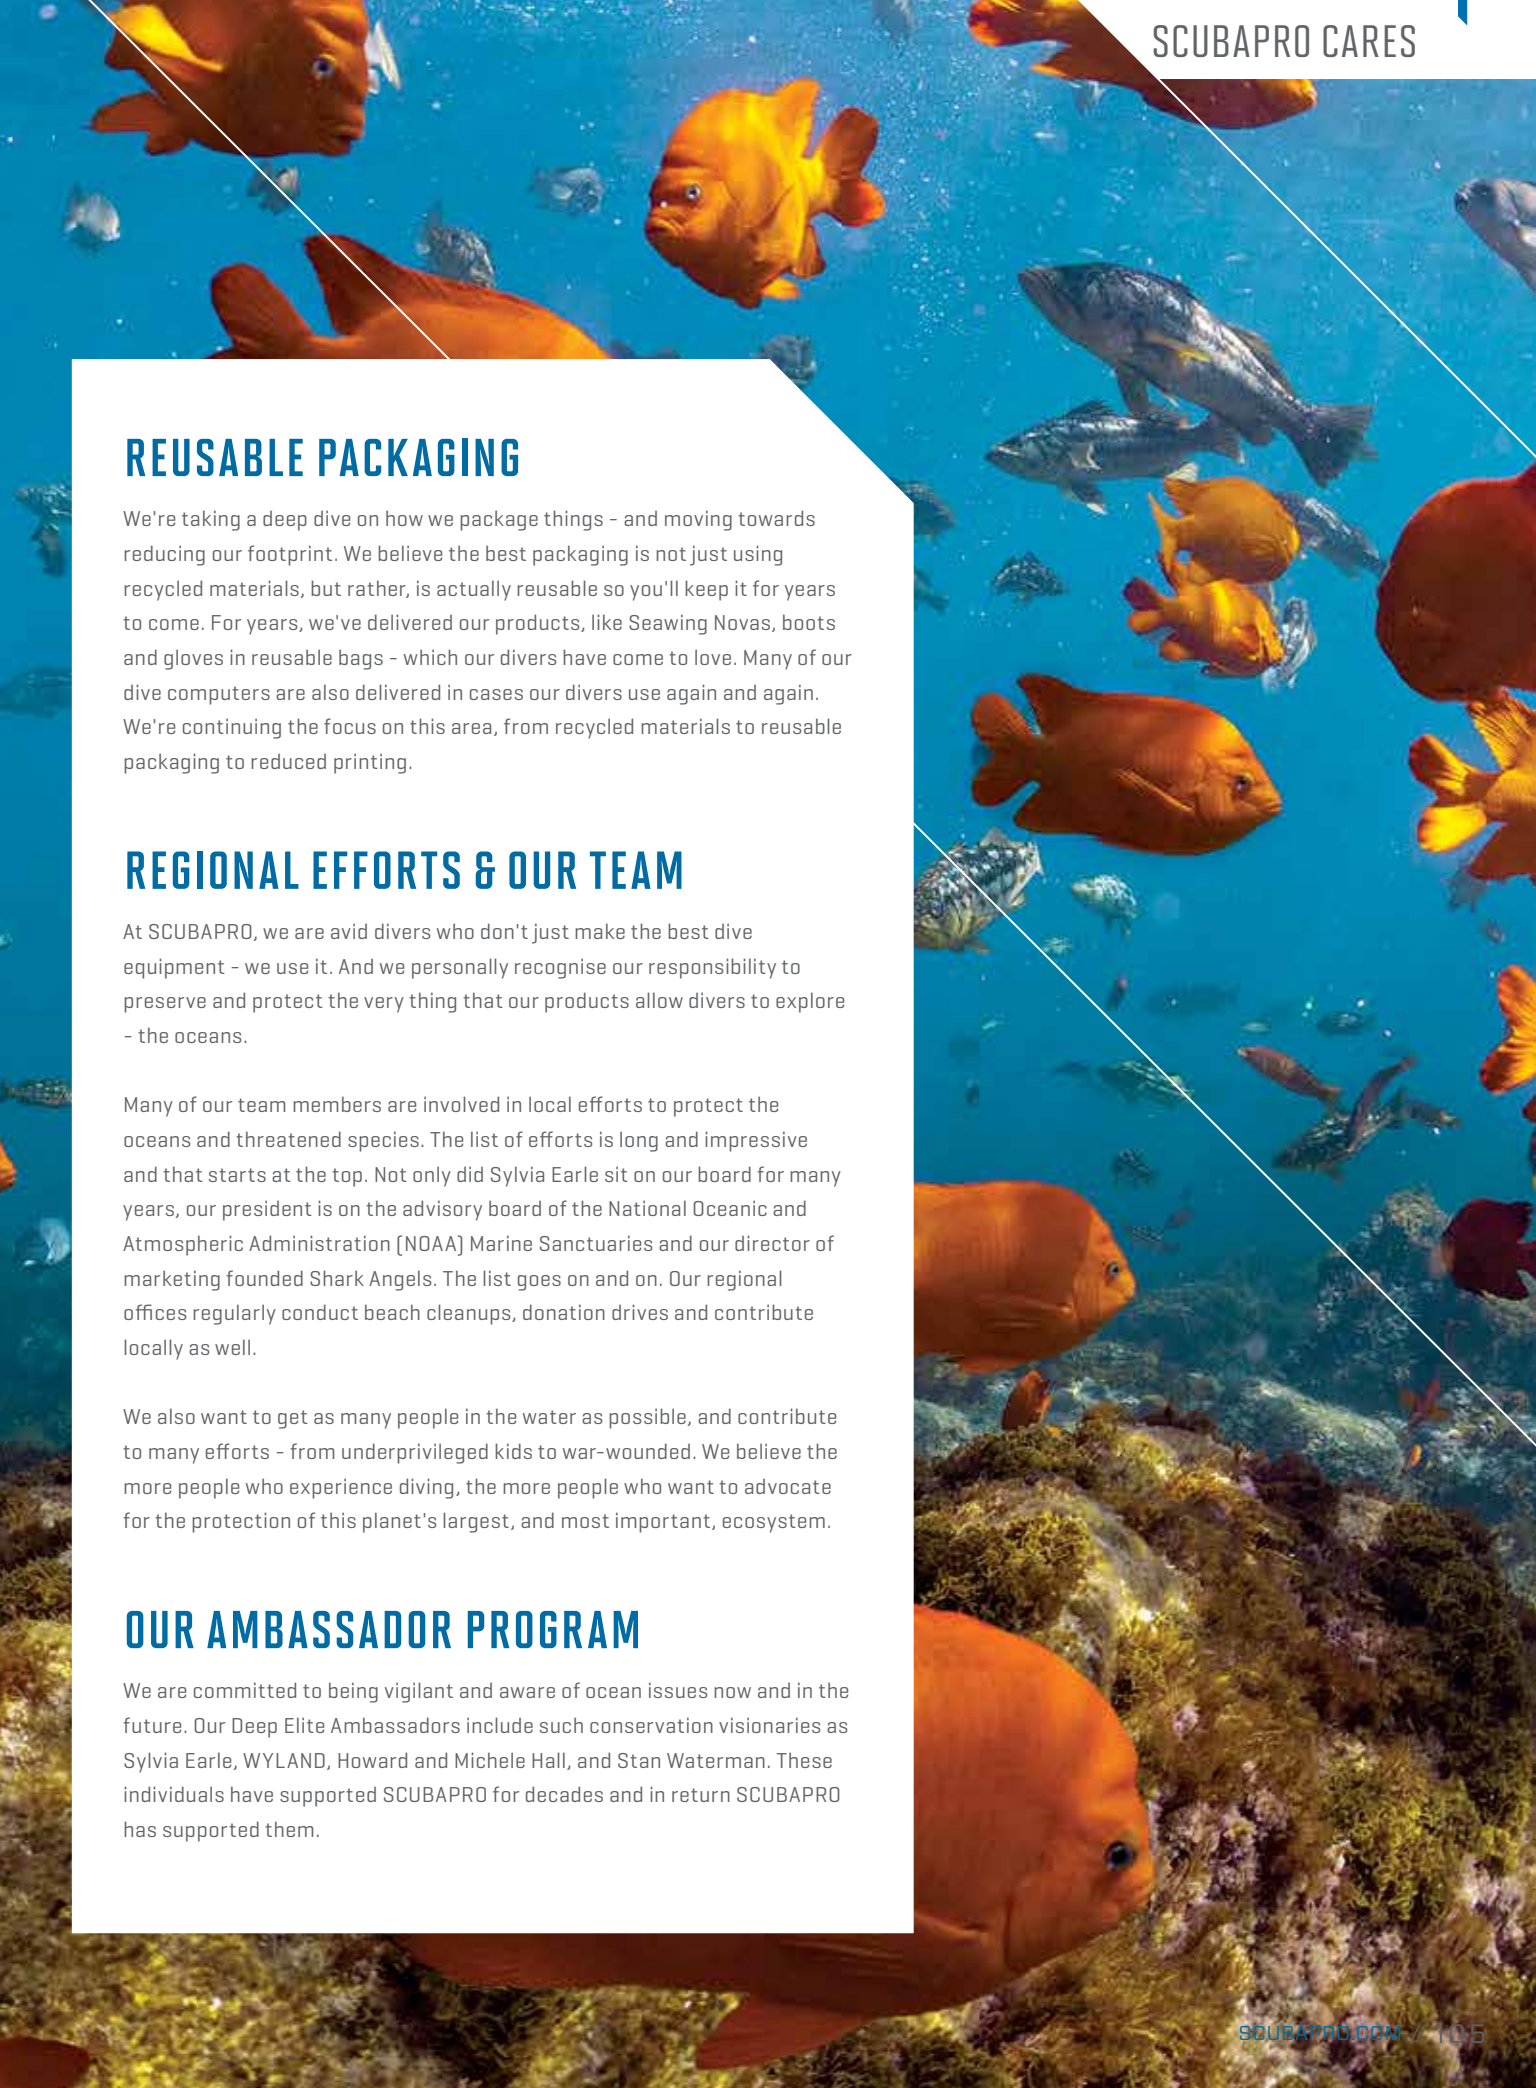
SCUBAPRO was first in diving in 2012 to introduce X-Foam blend neoprene as part of our ongoing effort to better protect divers. This year, SCUBAPRO is the first to introduce solvent-free glue. We've tested it for over 400 hours - and we know it is better for you - and better for the environment.

We've got some exciting products launching in upcoming months as well - including the industry's "greenest" or should we say "bluest" wetsuit. Stay tuned!

BUILDING AN OCEAN ETHOS

For over fifty years, we have a long history of supporting efforts of organisations like Sharkproject, SOS Seaturtles, Yaqu Pacha, Mission Blue, Galapagos National Parks, Shark Angels, Conservation International, WWF, Antinea Foundation, San Diego Oceans Foundation, REEF, and the National Marine Life Center, among others.

SCUBAPRO believes in building bridges not walls - and working together to take on the biggest issues facing the oceans, while encouraging every diver to be conservation minded. We are excited to share these efforts with you and encourage you to get involved as well.



REUSABLE PACKAGING

We're taking a deep dive on how we package things - and moving towards reducing our footprint. We believe the best packaging is not just using recycled materials, but rather, is actually reusable so you'll keep it for years to come. For years, we've delivered our products, like Seawing Novas, boots and gloves in reusable bags - which our divers have come to love. Many of our dive computers are also delivered in cases our divers use again and again. We're continuing the focus on this area, from recycled materials to reusable packaging to reduced printing.

REGIONAL EFFORTS & OUR TEAM

At SCUBAPRO, we are avid divers who don't just make the best dive equipment - we use it. And we personally recognise our responsibility to preserve and protect the very thing that our products allow divers to explore - the oceans.

Many of our team members are involved in local efforts to protect the oceans and threatened species. The list of efforts is long and impressive and that starts at the top. Not only did Sylvia Earle sit on our board for many years, our president is on the advisory board of the National Oceanic and Atmospheric Administration (NOAA) Marine Sanctuaries and our director of marketing founded Shark Angels. The list goes on and on. Our regional offices regularly conduct beach cleanups, donation drives and contribute locally as well.

We also want to get as many people in the water as possible, and contribute to many efforts - from underprivileged kids to war-wounded. We believe the more people who experience diving, the more people who want to advocate for the protection of this planet's largest, and most important, ecosystem.

OUR AMBASSADOR PROGRAM

We are committed to being vigilant and aware of ocean issues now and in the future. Our Deep Elite Ambassadors include such conservation visionaries as Sylvia Earle, WYLAND, Howard and Michele Hall, and Stan Waterman. These individuals have supported SCUBAPRO for decades and in return SCUBAPRO has supported them.
